REPORT ON INDUSTRIAL VISIT TO

“MALNAD ALLOYS AND CASTINGS PVT LTD”

The Department of Chemistry had organized an Industrial Visit to “Malnad Alloys and Castings Pvt. Ltd., Machenahalli, Shimoga” in the academic year **2022-23** for B.Sc., Chemistry students on **10.09.2022**.

‘Malnad Alloys and Castings Pvt. Ltd, Shimoga’ is one of the pioneer industries which is recognized for its excellence in alloys making and processing. Being one of the top industries in Alloys making and testing area, the company has marked its existence for producing a high-quality sand as a byproduct of industrial processing.

The students of Final year CBZ were taken to this industry to witness all the process involved in Alloys manufacture, wherein practical knowledge of manufacturing and processing units was gained. Steps involved in Alloys making and processing like, melting, molding, fettling, heat treatment, machine shop and testing facility were displayed to students.

Mr. Madhukar Jois, M.D of the company and Mr.Mahaveer Jain, Director of quality operations took special care and concern in this regard and supported the students to their best.

35 students from III B.Sc., CBZ visited the Industry.

REPORT ON INDUSTRIAL VISIT TO

“BASF CHEMICALS, MANGALORE”

The Department of Chemistry had organized an Industrial Visit to “**BASF CHEMICALS, MANGALORE**” in the academic year **2022-23** for B.Sc., Chemistry students on **13.01.2023 & 14.01.2023**.

BASF, Mangalore is the First Bio-based polyol production facility in Asia Pacific. It serves the fast-growing demand of eco-friendly products for new energy vehicles. It utilizes renewable materials to save fossil resources and supports stakeholders to meet sustainability goals.

48 students of III B.Sc (PCM) were taken to this industry and were educated regarding Chemicals, plastics, performance products and crop protection products to oil and gas. Students also learnt about how economic success is combined with environmental protection and social responsibility.

All students were provided with the basic and applied knowledge of Industry management and were given some hands-on-training.

Respected Sir,

Subject: Requisition letter for Two days educational trip

As sited above we are planning to go for an educational trip to Dandeli Paper Mill on 24-02-2023 and 25-02-2023 exclusively for Final B.Com students along with refreshment trip. This trip has been planned to make them aware about different process of manufacturing of paper and costing methods it gives them practical experience regarding various subjects of commerce and help them in taking future endeavor. As educational trip is one of the key elements of NAAC. So kindly grant us the permission to take the students for the excursion.

The following Teaching and Non-teaching staff has been entrusted to the trip.

List of the Teaching Non-Teaching Staff

Shivamogga.

To,

The Principal,
DVS College of Arts and Science,
Shivamogga.

Respected Sir,

Subject: Requesting your permission to arrange **Two Day's Study Tour to Mangalore University and Madikeri** for Final Year B.Sc. students.

* * * * *

With reference to the above subject, from Department of Mathematics, DVS College of Arts and Science, Shivamogga we are requesting your permission to arrange **Two Day's Study Tour to NITK Surathkal and Mangalore University** during **13 & 14th January-2023**, for our B.Sc. (5th-semester, A-Section) 50-students to motivate them to progress towards higher education. Study Tour Root plan as follows:

Date	Place
13-01-2023 (Day-01)	Shivamogga
	Mangalore University.
	Malpe, Udupi.
14-01-2023 (Day-02)	Madikeri
	Mugilupete
	Bhagamandala Honey Bee Centre
	Talakaveri.
	Kaveri Nisargadhama, Golden Temple.
	Shivamogga.

Please consider the request and grant for the same.

Thank you.

Place: Shivamogga.
Date: 02/01/2023.

Yours Sincerely
[HOD Dept of Mathematics]

-: ಜ್ಞಾಪನಾ :-

ವಿಷಯ: ತಮ್ಮ ಕಾಲೇಜು ಆಯೋಜಿಸಿರುವ 2022-23ನೇ ಸಾಲಿನ ಶೈಕ್ಷಣಿಕ ಪ್ರವಾಸಕ್ಕೆ ಅನುಮತಿ ನೀಡುವ ಬಗ್ಗೆ.

ಉಲ್ಲೇಖ: ತಮ್ಮ ಕಛೇರಿ ಪತ್ರ ಸಂಖ್ಯೆ: ಡಿ.ವಿ.ಎಸ್.ಎಂ.ಎಸ್/851/2022-23, ದಿ:02.01.2023

ಮೇಲ್ಕಂಡ ವಿಷಯಕ್ಕೆ ಸಂಬಂಧಪಟ್ಟಂತೆ ಉಲ್ಲೇಖಿತ ಪತ್ರದ ರೀತ್ಯಾ ತಾವು ದಿನಾಂಕ: 13.01.2023 ಮತ್ತು 14.01.2023ರಂದು ತಮ್ಮ ಕಾಲೇಜಿನ ತೃತೀಯ ಬಿ.ಎಸ್ಸಿ ಗಣಿತಶಾಸ್ತ್ರ ವಿದ್ಯಾರ್ಥಿಗಳನ್ನು ಮಡಿಕೇರಿ, NITK Surathkal and Mangalore University. ಈ ಸ್ಥಳಕ್ಕೆ ಶೈಕ್ಷಣಿಕ ಪ್ರವಾಸಕ್ಕೆ ಕರೆದುಕೊಂಡು ಹೋಗುವ ತಮ್ಮ ಕೋರಿಕೆಯನ್ನು ಈ ಕೆಳಕಂಡ ನಿಬಂಧನೆಗಳಿಗೆ ಒಳಪಟ್ಟು ಅನುಮತಿ ನೀಡಲಾಗಿದೆ;

1. ಪೂರ್ವಭಾವಿಯಾಗಿ ಕಾಲೇಜು ಶಿಕ್ಷಣ ಇಲಾಖೆಯ ಅನುಮತಿ ಪಡೆಯಬೇಕು.
2. ಲಿಖಿತರೂಪದಲ್ಲಿ ವಿದ್ಯಾರ್ಥಿಗಳ ಪೋಷಕರ ಸಮ್ಮತಿ ಪಡೆದಿರಬೇಕು.
3. ಪ್ರವಾಸಕ್ಕೆ ತೆರಳುವ ಪ್ರಾಧ್ಯಾಪಕರ ಹಾಗೂ ವಿದ್ಯಾರ್ಥಿಗಳ ಪಟ್ಟಿಯನ್ನು ಪೂರ್ವಭಾವಿಯಾಗಿ ಆಡಳಿತ ಮಂಡಳಿಗೆ ಸಲ್ಲಿಸಬೇಕು.
4. ಪ್ರವಾಸದಲ್ಲಿ ಭೇಟಿ ನೀಡುವ ಸ್ಥಳಗಳ ಕುರಿತಂತೆ ಆಡಳಿತ ಮಂಡಳಿಗೆ ಲಿಖಿತರೂಪದಲ್ಲಿ ವಿವರಣೆ ನೀಡಬೇಕು ಮತ್ತು ಆ ಸ್ಥಳಗಳಿಗೆ ಮಾತ್ರವೇ ಪ್ರವಾಸ ಕಾಲದಲ್ಲಿ ಭೇಟಿ ನೀಡುವುದು. ಪಟ್ಟಿಯಲ್ಲಿಲ್ಲದ ಸ್ಥಳಗಳಿಗೆ ಭೇಟಿ ನೀಡಲು ಅನುಮತಿ ಇರುವುದಿಲ್ಲ.
5. ಅಧಿಕೃತ ಪರವಾನಗಿ ಹೊಂದಿರುವ ಸಾರಿಗೆ ವಾಹನಗಳಲ್ಲೇ ಪ್ರವಾಸವನ್ನು ಆಯೋಜಿಸಬೇಕು.
6. ಪ್ರಯಾಣದ ಸಮಯದಲ್ಲಿ ಅಧಿಕೃತ ಸಾರಿಗೆ ವಾಹನ ಹಾಗೂ ವಾಹನ ಚಾಲಕರು ಸಾರಿಗೆ ಇಲಾಖೆಯ ನಿಯಮಾವಳಿಗಳ ಅನುಸಾರ ಮೂಲ ದಾಖಲೆಗಳನ್ನು ಹೊಂದಿರಬೇಕು.
7. ಪ್ರವಾಸದ ವಾಹನ ಚಾಲಕರು ಮತ್ತು ಸಿಬ್ಬಂದಿಯ ಪೂರ್ಣ ವಿವರವನ್ನು ಕಾಲೇಜಿನಲ್ಲಿ ಹೊಂದಿರಬೇಕು.
8. ಪ್ರವಾಸಕ್ಕೆ ತೆರಳುವ ವಿದ್ಯಾರ್ಥಿಗಳ ಸುರಕ್ಷತೆಯ ಜವಾಬ್ದಾರಿ ಕಾಲೇಜಿನ ಪ್ರಾಂಶುಪಾಲರದ್ದೇ ಆಗಿರುತ್ತದೆ.

Dear Sir,

**SUB: Request letter to permit our college III BSC students to visit your organization on 27.01.2023
(Around 10.30 AM)**

With reference to the above cited subject I would like to inform you that our college students studying in III BSc are on a field trip and they are supposed to visit Dairy to have knowledge about processing and preservation of milk. This field trip is prescribed in their syllabus and part of their curriculum & they have to submit a report on the field trip for their practical examination. This team is escorted by faculty members Sri. N. Kumaraswamy, Smt. Pruthvi. K.J, Mangala. D.H, Samhitha Mahima Bhargav, Smt. Sahana.G.& D.B. Prakash.

In this regard I request your good self to kindly permit them & oblige.

Thanking you,

Yours Truly

DEPARTMENT OF ZOOLOGY

REPORT ON FIELD TRIP

ORGANISED BY: Department of Zoology

DATE: 27.01.2023

Our department students studying in III BSc are on a field trip and they are supposed to visit Dairy to have knowledge about processing and preservation of milk. This field trip is prescribed in their syllabus and part of their curriculum & they have to submit a report on the field trip for their practical examination. First we first visited sericulture farm at Santhekadur... Students studied life cycle of silkworm, and visited the dairy, Machenahalli and studied processing and preservation of milk.

After the lunch, we visited aquaculture farm in BRP. The students could notice the culturing of carps, induced breeding and transportation of fingerlings. And later we visited Amruthapura temple in Tharikere. All the final year students have actively participated in the field trip and they have submitted the field trip reports.

To:

The Principal
DVS College of Arts and Science, Shimoga

Dear Sir,

SUB: Request letter to permit our college III BSC students to visit Sakrebailu Elephant camp

With reference to the above cited subject I would like to inform you that our college students studying in III BSc are on a field trip and they are supposed to visit Sakrebailu Elephant Camp on eve of celebration of World environmental day on 05/06/2023. In this regard I request your good self to kindly permit them & oblige.

Thanking you,

Yours Truly

(Prof N. KUMARASWAMY)

DEPARTMENT OF ZOOLOGY

REPORT ON FIELD TRIP TO SAKREBAILU ELEPHANT CAMP ON THE OCCASION OF ENVIRONMENTAL DAY

ORGANISED BY: Department of Zoology

DATE: 05/06/2023

Our department students studying in III BSc are taken to a field trip to Sakrebailu elephant camp on world environmental day. The bus facility was provided by our management to take our students. The program was organized by government association and students were given the demo of seed ball preparation and students have made many seed balls.

The planting of seedlings was undertaken on the account of environmental day and Minister Araga Jnanedra has visited and given the speeches on the occasion.

The students were having painting competition about the protecting the nature and many of our students have won the prizes and made our department proud.

KUVEMPU UNIVERSITY
DEPARTMENT OF ZOOLOGY

DVS COLLEGE OF ARTS AND SCIENCE SHIVAMOGGA

CERTIFICATE

This is to certify that project entitled **“A STUDY ON CROP PEST AND THEIR MANAGEMENT”** submitted in partial fulfillment of the requirements for the degree of BACHELOR OF SCIENCE (BSc. CBZ) in DEPARTMENT OF ZOOLOGY, D.V.S College of Arts and Science Shivamogga affiliated to KUVEMPU UNIVERSITY is a bonafide record of project work done by **NISARGA.M.P (S2003444), NISHA.G.K (S2004831), PAVAN KUMAR .M. C (S2003449), SANIYA TABASSUM (S2003487), SHAZAIN MURSALEEN BEGUM (S2003556), SRIMANTH.R (S2003509), VISHWANATHA.S (S2003532)** during the period of study 2022-2023 in the Department of Zoology under the guidance and supervision of faculties of the department and has not previously formed for the award of any degree.

L - Hospital rule (Indeterminate forms)

Let $f(x)$ & $g(x)$ be two real value continuous functions then at a point $x = a$, if $\lim_{x \rightarrow a} \frac{f(x)}{g(x)}$ tends to an indeterminate form (viz, $\frac{0}{0}$, $\frac{\infty}{\infty}$, 0^∞ , ∞^0 , ∞^∞ , 0^0 etc) then the process of differentiating $f(x)$ & $g(x)$ separately without applying quotient rule and then applying the limit until not attaining indeterminate form is called L-Hospital Rule.

Problem:

$$\lim_{x \rightarrow 2} \left[\frac{x^3 - 7x^2 + 10x}{x^2 + x - 6} \right]$$

$$\left[\frac{2^3 - 7(2)^2 + 10(2)}{2^2 + 2 - 6} \right] =$$

$$= \left[\frac{8 - 28 + 20}{6 - 6} \right] = \frac{0}{0} \text{ form.}$$

By L-Hospital rule,

$$\lim_{x \rightarrow 2} \left[\frac{3x^2 - 7(2x) + 10}{2x + 1} \right]$$

$$= \left[\frac{3(2)^2 - 7(2(2)) + 10}{2(2) + 1} \right]$$

$$= \left[\frac{12 - 28 + 10}{5} \right] = \underline{\underline{-\frac{6}{5}}}$$

$$2) \lim_{x \rightarrow \infty} \left[\frac{e^x}{x^2} \right] = \left(\frac{\infty}{\infty} \right) \text{ if}$$

By L Hospital Rule,

$$\lim_{x \rightarrow \infty} \left[\frac{e^x}{2x} \right] = \frac{\infty}{\infty}$$

$$\Rightarrow \lim_{x \rightarrow \infty} \left[\frac{e^x}{2} \right] = \infty$$

$$3) \lim_{x \rightarrow 0} \left[\frac{\sin x}{x} \right] = \left(\frac{0}{0} \right)$$

By LH Rule

$$\Rightarrow \lim_{x \rightarrow 0} \left[\frac{\cos x}{1} \right]$$

$$\Rightarrow \cos 0 = 1$$

$$\lim_{x \rightarrow 0} \left[\frac{\sin mx}{\sin nx} \right] = \frac{0}{0}$$

By L-Hospital Rule,

$$\lim_{x \rightarrow 0} \left[\frac{m \cos mx}{n \cos nx} \right]$$

$$\Rightarrow \frac{m}{n} (1) = \frac{m}{n}$$

$$\lim_{x \rightarrow 0} \left[\frac{\tan x}{x} \right]^{1/x^2}$$

$$\text{let } l = \lim_{x \rightarrow 0} \left[\frac{\tan x}{x} \right]^{1/x^2}$$

Apply log on both side

$$\log l = \lim_{x \rightarrow 0} \frac{1}{x^2} \log \left[\frac{\tan x}{x} \right]$$

$$= \lim_{x \rightarrow 0} \frac{\log \left[\frac{\tan x}{x} \right]}{x^2} = \frac{0}{0}$$

By L-Hospital Rule

$$\lim_{x \rightarrow 0} \left[\frac{1}{\frac{\tan x}{x}} \left\{ \frac{\sec^2 x \cdot x - \tan x \cdot 1}{x^2} \right\} \right]$$

$$\lim_{x \rightarrow 0} \left[\frac{x}{\tan x} \left[\frac{x \sec^2 x - \tan x}{2x} \right] \right]$$

$$\lim_{x \rightarrow 0} \left[\frac{x \sec^2 x - \tan x}{2x^2 \tan x} \right] = \frac{0}{0}$$

$$\lim_{x \rightarrow 0} \left[\frac{2 \sec^2 x \cdot \tan x - \sec^2 x}{4x} \right]$$

$$\frac{1}{4} \lim_{x \rightarrow 0} \left[\frac{2(2 \sec x \cdot \sec x \cdot \tan x \tan x + \sec^2 x \sec x) - 2 \sec x \cdot \sec x \tan x}{1} \right]$$

$$\frac{1}{4} \left[\frac{1 - 2(0)}{1} \right] = \frac{1}{4}$$

$$\therefore \log d = \frac{1}{4}$$

$$\Rightarrow \boxed{d = e^{1/4}}$$

$$\lim_{x \rightarrow 0} \left(\frac{1}{x} \right)^{\tan x}$$

$$\text{Let } d = \lim_{x \rightarrow 0} \left(\frac{1}{x} \right)^{\tan x}$$

Take log on both side.

$$\log d = \lim_{x \rightarrow 0} \log \tan x \log \left(\frac{1}{x} \right)$$

By L-Hospital rule,

$$\log d = \lim_{x \rightarrow 0} \frac{\log \left(\frac{1}{x} \right)}{\cot x}$$

$$\Rightarrow \log d = \lim_{x \rightarrow 0} \left[\frac{\left(\frac{1}{x}\right) \cdot \left(-\frac{1}{x^2}\right)}{-\operatorname{cosec}^2 x} \right]$$

$$= \lim_{x \rightarrow 0} \left[\frac{x \left(-\frac{1}{x^2}\right)}{\operatorname{cosec}^2 x} \right] = \lim_{x \rightarrow 0} \left[\frac{1/x}{\operatorname{cosec}^2 x} \right]$$

$$= \lim_{x \rightarrow 0} \left[\frac{1/x}{1/\sin^2 x} \right] = \lim_{x \rightarrow 0} \left[\frac{\sin^2 x}{x} \right] = \frac{0}{0}$$

By L-H Rule.

$$\Rightarrow \lim_{x \rightarrow 0} \left[\frac{2 \sin x \cos x}{1} \right]$$

$$= 2 \sin(0) \cos(0) = 0$$

$$\log d = 0$$

$$\Rightarrow \boxed{d = e^0 = 1}$$

$$d = \lim_{x \rightarrow 1} \left[(1-x^2)^{\frac{1}{\log(1-x)}} \right]$$

Apply log on both side.

$$\Rightarrow \log d = \lim_{x \rightarrow 1} \frac{1}{\log(1-x)}$$

$$\log(1-x^2)$$

$$\lim_{x \rightarrow 1} \left[\frac{\log(1-x^2)}{\log(1-x)} \right]$$

By LH Rule.

$$\log d = \lim_{x \rightarrow 1} \left[\frac{\frac{1}{(1-x^2)} (-2x)}{\frac{1}{(1-x)} (-1)} \right]$$

$$\lim_{x \rightarrow 1} \left[\frac{2x(1-x)}{(1-x^2)} \right]$$

$$\lim_{x \rightarrow 1} \left[\frac{2x(1-x)}{(1-x)(1+x)} \right]$$

$$\log d = \frac{2(1)}{1+1} = \frac{2}{2} = 1$$

$$\log d = 1 \Rightarrow \boxed{d = e}$$

POLAR COORDINATES

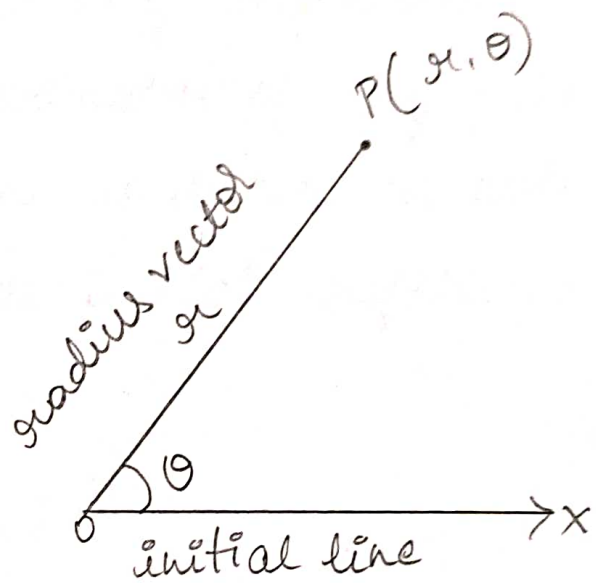

Introduction:-

In Mathematics, the polar coordinate system is a two dimensional co-ordinate system in which each point on a plane is determined by a distance from reference point and an angle from reference direction.

In this chapter we shall study the concepts related to polar coordinates functions in polar co-ordinates, study of plane curves including radius vector, tangent, angle b/w them length of perpendicular from pole to the tangent, pedal equation derivation arc, curvature of plane curves, radius and centre of curvature finally

POLAR COORDINATES

When each point on a plane of a two-dimensional coordinate system is decided by a distance from a reference point and an angle is taken from a reference direction it is known as the polar coordinate system.

Cartesian coordinate system Polar coordinate system

Let 'P' be the point on the plane represented by Cartesian coordinates as (x, y) . In the polar coordinate system we start with a fixed point called pole or origin and a fixed straight line called initial reference.

Let 'O' be the pole and 'OX' be the initial line. Let P be the given point then the distance OP is called radius vector.

represented by ' r ' and OP makes an angle with initial line represented by ' θ '

Here the coordinates (r, θ) of the point P on a plane are called as Polar coordinates.

Relation b/w cartesian & Polar coordinates:
Let (x, y) & (r, θ) respectively represents the cartesian and polar coordinates of any point P on a plane where origin is taken as pole and x axis is taken as initial reference

From the diagram we get

$$\cos \theta = \frac{\text{adj}}{\text{hyp}}$$

$$\cos \theta = \frac{Oa}{OP}$$

$$\cos \theta = \frac{x}{r}$$

$$x = r \cos \theta$$

$$\text{|||} \sin \theta = \frac{\text{opp}}{\text{hyp}}$$

$$\sin \theta = \frac{PQ}{OP}$$

$$\sin \theta = \frac{y}{r}$$

$$y = r \sin \theta$$

By squaring and adding we get

$$\begin{aligned}x^2 + y^2 &= r^2 \cos^2 \theta + r^2 \sin^2 \theta \\&= r^2 [\cos^2 \theta + \sin^2 \theta] \\&= r^2 [1] \\&= r^2\end{aligned}$$

$$x^2 + y^2 = r^2$$

$$r = \sqrt{x^2 + y^2}$$

$$\text{|||} \frac{y}{x} = \frac{r \sin \theta}{r \cos \theta}$$

$$\frac{y}{x} = \frac{\sin \theta}{\cos \theta}$$

$$\frac{y}{x} = \tan \theta$$

$$\theta = \tan^{-1} \left(\frac{y}{x} \right)$$

Valued:

Exact Differential Equations:-

A differential equation is said to be exact if it can be obtained by its general solution on differentiation without any transformation or elimination of arbitrary constant.

Working Rule:-

If the DE $Mdx + Ndy = 0$ is exact

- (i) Integrate 'M' w.r.t x keeping y as constant,
- (ii) Integrate 'N' w.r.t y and eliminate the terms containing x .
- (iii) Equate it to C , the arbitrary constant.

$$\int_{y=\text{constant}} Mdx + \int_{x=\text{delete}} Ndy = \int 0 = C$$

→ Solve :-

$$\textcircled{1} 3x(xy-2)dx + (x^3+2y)dy = 0$$

Sol:- Given, $(3x^2y - 6x)dx + (x^3 + 2y)dy = 0$

$$M = 3x^2y - 6x$$

$$N = x^3 + 2y$$

$$\frac{\partial M}{\partial y} = 3x^2 \quad \frac{\partial N}{\partial x} = 3x^2$$

$$\therefore \frac{\partial M}{\partial y} = \frac{\partial N}{\partial x} \Rightarrow \textcircled{1} \text{ is an exact DE.}$$

$$\text{Now, } \int (3x^2y - 6x)dx + \int (x^3 + 2y)dy = C'$$

$y = \text{constant}$

$x \text{ delete}$

$$\Rightarrow 3x^3/3 y - 6x^2/2 + 2y^2/2 = C'$$

$$\Rightarrow \underline{x^3y - 3x^2 + y^2 = C'}$$

$\therefore x^3y - 3x^2 + y^2$ is the general solution of $\textcircled{1}$.

→ Solve

$$\textcircled{2} (x^2 - ay)dx - (ax - y^2)dy$$

Sol:- $M = x^2 - ay \quad N = -ax + y^2$

$$\frac{\partial M}{\partial y} = -a$$

$$\frac{\partial N}{\partial x} = -a$$

$$\therefore \frac{\partial M}{\partial y} = \frac{\partial N}{\partial x} \text{ is exact D.E.}$$

$$\Rightarrow \int (x^2 - ay)dx - \int (ax - y^2)dy = C'$$

$$\Rightarrow \underline{x^3/3 - axy + y^3/3 = C' \text{ is the QS}}$$

→ Solve

$$(3) (12x + 5y - 9)dx + (5x + 2y - 4)dy = 0 \rightarrow (*)$$

Sol:- Given,

$$(12x + 5y - 9)dx + (5x + 2y - 4)dy = 0 \rightarrow (*)$$

$$M = 12x + 5y - 9$$

$$N = 5x + 2y - 4$$

$$\frac{\partial M}{\partial y} = 5 \quad \frac{\partial N}{\partial x} = 5$$

$\therefore \frac{\partial M}{\partial y} = \frac{\partial N}{\partial x} \Rightarrow (*)$ is an exact differential equation

Now,

$$\int (12x + 5y - 9)dx + \int (5x + 2y - 4)dy = C$$

y constant x-delete

$$\Rightarrow \frac{12x^2}{2} + 5y - 9x + \frac{y^2}{2} - 4y = C$$

$$\Rightarrow \underline{6x^2 + 5y - 9x + \frac{y^2}{2} - 4y = C} \text{ is the general solution of } (*)$$

→ Solve

$$(4) (x - 2y)dx + 2(y - x)dy = 0 \rightarrow (*)$$

Sol:- $M = x - 2y$ $N = 2y - 2x$

$$\frac{\partial M}{\partial x} = 1 \quad \frac{\partial N}{\partial y} = 2 \quad \therefore \frac{\partial M}{\partial y} = \frac{\partial N}{\partial x} \Rightarrow (*) \text{ is exact DE.}$$

$$\Rightarrow \int (x - 2y)dx + \int (2y - 2x)dy = C$$

y constant x-delete

$$\Rightarrow \frac{x^2}{2} - 2xy + \frac{2y^2}{2} = C$$

$$\Rightarrow \underline{\underline{\frac{x^2}{2} - 2xy + y^2 = C}} \text{ is the [G.S] General Solution.}$$

→ Solve

$$(5) (2x^3 - xy^2 - 2y + 3)dx - (x^2y + 2x)dy = 0$$

Sol:- Given, $(2x^3 - xy^2 - 2y + 3)dx - (x^2y + 2x)dy = 0$
↳ (*)

$$M = 2x^3 - xy^2 - 2y + 3$$

$$N = x^2y + 2x$$

$$\frac{\partial M}{\partial y} = -2xy - 2$$

$$\frac{\partial N}{\partial x} = -2xy - 2$$

∴ $\frac{\partial M}{\partial y} = \frac{\partial N}{\partial x} \Rightarrow$ eqn (*) is exact DE.

$$\Rightarrow \int (2x^3 - xy^2 - 2y + 3)dx - \int (x^2y + 2x)dy = \int 0$$

$$\Rightarrow \frac{2x^4}{4} - \frac{x^2y^2}{2} - 2xy + 3x = C_1$$

$\Rightarrow \frac{x^4}{2} - \frac{x^2y^2}{2} - 2xy + 3x = C_1$ is the General Solution of (*).

10/100

ORDER AND RANKING

1] In a row of 48 students, Rohan is 26th from right end and Sohan is 12th from left end. How many student are between them?

A:- Given?

Total number of student = 48

Rank of Rohan from right end = 26

Rank of Sohan from left end = 12

mid number = ?

$$\begin{aligned} \text{mid number} &= \text{Total number} - \text{Rank from right} - \text{Rank from left} \\ &= 48 - 26 - 12 \end{aligned}$$

$$= \underline{\underline{10}}$$

∴ 10 student are there between Rohan and Sohan.

2] Shalu is 5th to the right of Nitima who is 24th from right end shivi is 8th to the left of shalu and is 21st from left end then

How many students are there in the row?
→ Given:-

Rank of shalu from nitima right = 5
Rank of nilima from right end = 24
Rank of shivi left of shalu = 8
Rank of shivi from left end = 21
Total number = ?

$$\begin{aligned} \text{Rank of shivi from right end} &= \text{Rank of nilima from right end} + \text{Rank of shivi from left of nitima} \\ &= 24 + 13 \\ &= 37 \end{aligned}$$

$$\begin{aligned} \text{Total no} &= \text{Rank of shivi from left end} + \text{Rank of shivi from right end} - 1 \\ &= 21 + 37 - 1 \\ &= 57 \end{aligned}$$

∴ There 57 students in a row

3) Rahema is 11th to the left of shan who is 28th from the left end of a row of 40 students. Then what will be Rahema position from Right?

→ Given: -

Rank of Shan from left end = 28
Total number = 40

Raheema rank from left of Shan = 11
Rank of Raheema from right = ?

Rank of Shan = Total no - Rank from Right + 1
from right end end

$$= 40 - 28 + 1$$

$$= 13$$

Rank of Raheema from right = 13 + 11
= 24

∴ Rank of Raheema from right end = 24

4] Ranjan is sixteenth from the left end and Vinod is tenth from the right end in a row of boys. If there are eight boys between Ranjan and Vinod how many boys are there in the row?

→ Given:-

Rank of Ranjan from left = 16

Rank of Vineet from right = 10

Boys between Ranjan and Vineet = 8

Total no of boys = ?

$$\begin{aligned}\text{Total no} &= \text{Rank of from left} + \text{Rank from right} - 1 \\ &= 16 + 10 - 1 \\ &= 25 + 8 \\ &= \underline{33}\end{aligned}$$

∴ Total no of boys in row is 33.

5] Greta is taller than Seeta but not shorter than Radha and Rani are of the same height Greta is shorter than Pam. Among all the girls who is the shorter?

→ Seeta is ~~shorter~~ shorter than all girls as she is shorter from Greta who is taller than Seeta but shorter from all girls.

~~Shorter~~

SEMINAR REPORT

(Based on NEP-2020)

Name of the Student : Sahana.K.B
Registration Number : U06DE22S0118
Semester & Course : B.Sc IInd Semester.
Academic Year : 2022-23
Assignment Topic : ಗುಂಪು

Assignment submitted to : Department of Mathematics

Date of submission :

Principal
D.V.S. College of Arts & Science
Shivamogga

$\langle \sim : \text{Groups} : \sim \rangle$

Binary operations : \sim

- * Addition
- * Multiplication
- * Subtraction
- * Division

A Non Empty Set \mathcal{G} with the Mapping $* : \mathcal{G} \longrightarrow \mathcal{G}$

$* : (\mathcal{G} \times \mathcal{G}) \xrightarrow{\text{OH}} \mathcal{G}$ is called as a set with Binary operations.

Example : \sim

$$N = \{1, 2, 3, 4, 5, 6\}$$

$$\text{Let } a, b \in N \quad \mathcal{G} = N$$

$* : (N \times N) \longrightarrow N$, defined by

$$i) \quad a * b = a + b$$

$$a = 1 \in N$$

$$b = 2 \in N$$

$$a + b = 1 + 2 = 3 \in N$$

\therefore '+' is a binary operation under Natural numbers.

$$ii) a \times b = a - b$$

\therefore '—' is not binary operation under Natural Numbers

$$iii) a \times b = a \cdot b$$

$$a = 1 \in \mathbb{N}$$

$$b = 2 \in \mathbb{N}$$

$$a \cdot b = 1 \cdot 2 = 2 \in \mathbb{N}$$

\therefore 'x' or '.' is a Binary operation under Natural Numbers

$$iv) a \times b = a \div b$$

$$a = 1 \in \mathbb{N}$$

$$b = 2 \in \mathbb{N}$$

$$a \div b = \frac{1}{2} = 0.5 \notin \mathbb{N}$$

\therefore ' \div ' is not a Binary operation under Natural Numbers.

Definition :-

A Non-Empty Set \mathcal{Q} . With the Binary operation \times is said to be a group. It is satisfied 4 laws.

i) closure law \Rightarrow

$$\forall a, b \in G \Rightarrow (a * b) \in G$$

ii) Associative law \Rightarrow

$$\forall a, b \& c \in G$$

$$\Rightarrow (a * b) * c = a * (b * c)$$

iii) Identity law \Rightarrow

$$\forall a, b \in G \Rightarrow a * e = a = e * a$$

where, e is identity element

iv) inverse law \Rightarrow

$\forall a \in G, \exists a^{-1} \in G$, such that

$$a * a^{-1} = e = a^{-1} * a$$

then a^{-1} is called inverse element of a .

If G satisfies commutative law,

$$(i.e., a * b = b * a)$$

then G is called "Commutative Group"

OR

"ABELIAN GROUP"

$$i.e., \forall a, b \in G \Rightarrow a * b = b * a.$$

Problems 3-4

1) Show that $(\mathbb{Z}, +)$ is a group, where \mathbb{Z} is the set of integers in $(\mathbb{Z}, +)$ Abelian?

$$\mathbb{Z} = \{ \dots, -3, -2, -1, 0, 1, 2, 3, \dots \}$$

Let $m, n \in \mathbb{Z}$

i) closure law

$$\forall m, n \in \mathbb{Z} \Rightarrow (m+n) \in \mathbb{Z}$$

\therefore closure law is satisfied

$$-2, 3 \Rightarrow -2 + 3 = 1$$

ii) Associative law

$$\text{Let } m, n, p \in \mathbb{Z}$$

$$\Rightarrow (m+n)+p = m+(n+p)$$

\therefore Associative law is satisfied

iii) Identity law

$$\forall m \in \mathbb{Z} \Rightarrow m * e = m = e * m$$

$$\text{If } * = +, \boxed{e=0}$$

$$m + 0 = m = 0 + m, \quad 0 \in \mathbb{Z}$$

\therefore Identity law is satisfied

iv) Inverse law

$$\forall m \in \mathbb{Z}, m * m^{-1} = e = m^{-1} * m, \quad e \in \mathbb{Z}$$

$$y * = + \boxed{e=0}$$

$$m + m^{-1} = 0 = m^{-1} + m, \quad 0 \in \mathbb{Z}$$

$$m^{-1} \in \mathbb{Z}$$

$$m + m^{-1} = 0$$

$\Rightarrow m^{-1} = (0 + m) = -m \in \mathbb{Z}$ & hence
inverse law holds good.

$(\mathbb{Z}, +)$ is a group

v) Commutative law

$$\forall m, n \in \mathbb{Z} (m * n) = (n * m) \in \mathbb{Z}$$

$$\Rightarrow (m + n) = (n + m) \in \mathbb{Z}$$

\therefore Commutative law holds good

$\Rightarrow (\mathbb{Z}, +)$ is Abelian

② Show that the set of integers under multiplication is not a group?

$$\rightarrow \mathbb{Z} = \{ \dots -3, -2, -1, 0, 1, 2, 3 \dots \}$$

Let $m \neq n \in \mathbb{Z}$

i) closure law :- $\forall m, n \in \mathbb{Z} \Rightarrow (m \times n) \in \mathbb{Z}$
 \therefore closure law is satisfied

ii) Associative law :- Let $m, n, p \in \mathbb{Z} \Rightarrow$
 $(m \times n) \times p = m \times (n \times p)$
 \therefore Associative law satisfied

iii) Identity law :- $\forall m \in \mathbb{Z} \Rightarrow$
 $m \times e = m = e \times m, e \in \mathbb{Z}$

$$\forall * = x, \boxed{e=1}$$

$$\therefore m \times 1 = m = 1 \times m, 1 \in \mathbb{Z}$$

\therefore Identity law is satisfied

iv) Inverse law :-

$$\forall m \in \mathbb{Z}, m \times m^{-1} = e = m^{-1} \times m$$

$$e \in \mathbb{Z}, m^{-1} \in \mathbb{Z}$$

$$\forall * = x, \boxed{e=1}$$

$$\therefore m \times m^{-1} = 1 = m^{-1} \times m, 1 \in m$$

$$m^{-1} \in \mathbb{Z}$$

$$m \times m^{-1} = 1 \Rightarrow m^{-1} = \frac{1}{m} \notin \mathbb{Z}$$

\therefore Inverse law is not satisfied

$\therefore (\mathbb{Z}, \times)$ is not a group
 $\underline{=}$

3) Show that the set $e = \left\{ \begin{pmatrix} a & b \\ c & d \end{pmatrix} \in M_2(\mathbb{R}) \right\}$ such that $a, b, c, d \in \mathbb{R}$ is a group under addition where \mathbb{R} -s set of real numbers $M_2(\mathbb{R}) \rightarrow$ set of matrices of order 2×2 with real entries.

i) closure law: let $\begin{pmatrix} a & b \\ c & d \end{pmatrix} \in e$ & $\begin{pmatrix} p & q \\ r & s \end{pmatrix} \in e$

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} + \begin{pmatrix} p & q \\ r & s \end{pmatrix} = \begin{pmatrix} a+p & b+q \\ c+r & d+s \end{pmatrix} \in e$$

\therefore closure law is satisfied

ii) Associative law:

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} \begin{pmatrix} p & q \\ r & s \end{pmatrix} \in \begin{pmatrix} e & f \\ g & h \end{pmatrix} \in e$$

$$\left[\begin{pmatrix} a & b \\ c & d \end{pmatrix} + \begin{pmatrix} p & q \\ r & s \end{pmatrix} \right] + \begin{pmatrix} e & f \\ g & h \end{pmatrix} = \begin{pmatrix} a & b \\ c & d \end{pmatrix} + \left[\begin{pmatrix} p & q \\ r & s \end{pmatrix} + \begin{pmatrix} e & f \\ g & h \end{pmatrix} \right]$$

$$\left[\begin{pmatrix} a+p & b+q \\ c+r & d+s \end{pmatrix} \right] + \begin{pmatrix} e & f \\ g & h \end{pmatrix} = \begin{pmatrix} a & b \\ c & d \end{pmatrix} + \left[\begin{pmatrix} p+e & q+f \\ r+g & s+h \end{pmatrix} \right]$$

$$\begin{bmatrix} a+p+e & b+q+f \\ c+r+g & d+s+h \end{bmatrix} = \begin{bmatrix} a+p+e & b+q+f \\ c+r+g & d+s+h \end{bmatrix} \in e$$

\therefore associative law is satisfied

iii) Identity law: $a * e = a = e * a$

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} + \begin{pmatrix} 0 & 0 \\ 0 & 0 \end{pmatrix} = \begin{pmatrix} a & b \\ c & d \end{pmatrix}$$

$$e = \begin{pmatrix} 0 & 0 \\ 0 & 0 \end{pmatrix} = e$$

\therefore Identity law is satisfied

iv) Inverse law :

$$a * a^{-1} = e \begin{pmatrix} a & b \\ c & d \end{pmatrix} + \begin{pmatrix} -a & -b \\ -c & -d \end{pmatrix} = \begin{pmatrix} 0 & 0 \\ 0 & 0 \end{pmatrix}$$

$\Rightarrow \begin{pmatrix} -a & -b \\ -c & -d \end{pmatrix}$ is the inverse element of

$$\begin{bmatrix} a & b \\ c & d \end{bmatrix}$$

\therefore hence inverse law is satisfied

$\therefore G$ is a group under $+$

* commutative law (Abelian law)

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} + \begin{pmatrix} e & f \\ g & h \end{pmatrix} = \begin{pmatrix} e & f \\ g & h \end{pmatrix} + \begin{pmatrix} a & b \\ c & d \end{pmatrix}$$

$$\begin{pmatrix} a+e & b+f \\ c+g & d+h \end{pmatrix} = \begin{pmatrix} e+a & f+b \\ g+c & h+d \end{pmatrix} \in G$$

$\therefore G$ is abelian group

Jacobian

What is jacobian?

The term "jacobian" often represents both the jacobian matrix and determinants, which represent is defined for the finite number of function with the same number of variables. Here each row consists of the first partial derivative of the same function, with respect to the variables. The jacobian matrix can be of any form. It may be a square matrix (number of rows and number of columns are equal) or the rectangular matrix (the number of rows and columns are not equal).

Jacobian Matrix

For a function $f: \mathbb{R}^3 \rightarrow \mathbb{R}$, the derivative at p for a row vector is defined as.

$$\left(\frac{\partial f}{\partial x_1}(p), \frac{\partial f}{\partial x_2}(p), \dots, \frac{\partial f}{\partial x_n}(p) \right)$$

The Jacobian matrix for the given matrix is

$$\begin{bmatrix} \frac{\partial f^1}{\partial x_1} & \frac{\partial f^1}{\partial x_2} & \dots & \frac{\partial f^1}{\partial x_m} \\ \frac{\partial f^2}{\partial x_1} & \frac{\partial f^2}{\partial x_2} & & \frac{\partial f^2}{\partial x_m} \\ \frac{\partial f^3}{\partial x_1} & \frac{\partial f^3}{\partial x_2} & & \frac{\partial f^3}{\partial x_m} \end{bmatrix}$$

The determinant for the above jacobian matrix is called a jacobian.

Jacobian Determinant

In a 2x2 jacobian matrix, if $m=n=2$ and the function $f: \mathbb{R}^2 \rightarrow \mathbb{R}^2$, is defined as: function,

$$f(x, y) = (u(x, y), v(x, y))$$

Here the jacobian matrix is written as:-

$$J = \begin{bmatrix} \frac{\partial u}{\partial x} & \frac{\partial u}{\partial y} \\ \frac{\partial v}{\partial x} & \frac{\partial v}{\partial y} \end{bmatrix}$$

Therefore, the determinant of a jacobian matrix is

$$\det(J) = \begin{vmatrix} \frac{\partial u}{\partial x} & \frac{\partial u}{\partial y} \\ \frac{\partial v}{\partial x} & \frac{\partial v}{\partial y} \end{vmatrix}$$

$$\det(J) = \left| \frac{\partial u}{\partial x} \cdot \frac{\partial v}{\partial y} - \frac{\partial u}{\partial y} \cdot \frac{\partial v}{\partial x} \right|$$

Jacobian Examples:-

Let $x(u, v) = u^2 - v^2$, $y(u, v) = 2uv$ find the jacobian $J(u, v)$

Given $x(u, v) = u^2 - v^2$

$$y(u, v) = 2uv$$

we know that

$$J(u, v) = \begin{bmatrix} x_u & x_v \\ y_u & y_v \end{bmatrix}$$

$$J(u, v) = \begin{bmatrix} 2u & -2v \\ 2v & 2u \end{bmatrix}$$

$$J(u, v) = 4u^2 + 4v^2$$

Therefore, $J(u, v)$ is $4u^2 + 4v^2$

Q.2:- For a normal Cartesian to polar transformation, the equation can be written as:-

$$x = r \cos \theta \quad y = r \sin \theta$$

The jacobian determinant is written as

$$J(r, \theta) = \begin{bmatrix} \frac{\partial x}{\partial r} & \frac{\partial x}{\partial \theta} \\ \frac{\partial y}{\partial r} & \frac{\partial y}{\partial \theta} \end{bmatrix}$$

Using these p.d on the polar equation we get

$$J(r, \theta) = \begin{vmatrix} \cos \theta & -r \sin \theta \\ \sin \theta & r \cos \theta \end{vmatrix}$$

$$J(r, \theta) = r(\sin^2 \theta + \cos^2 \theta) = r(1)$$

$$J(r, \theta) = 1$$

Properties of Jacobian.

1. If u and v are function of x and y then

$$\frac{\partial(u,v)}{\partial(x,y)} \times \frac{\partial(x,y)}{\partial(u,v)} = 1 \rightarrow \text{①}$$

2) if u and v are functions of x, s and x, s are functions of x, y then (Chain rule)

$$\frac{\partial(u,v)}{\partial(x,y)} = \frac{\partial(u,v)}{\partial(x,s)} \times \frac{\partial(x,s)}{\partial(x,y)}$$

3) If functions u, v, w of three independent variables x, y, z are not independent, then

$$\frac{\partial(u,v,w)}{\partial(x,y,z)} = 0$$

Relationship (u, v, w)

Q₃: The Spherical cartesian transformation

The transformation from spherical coordinates (ρ, ϕ, θ) to cartesian coordinates (x, y, z) is given by the function

$$F: \mathbb{R}^+ \times [0, \pi] \times [0, 2\pi] \rightarrow \mathbb{B}^3 \text{ with components}$$

$$x = \rho \sin \phi \cos \theta$$

$$y = \rho \sin \phi \sin \theta$$

$$z = \rho \cos \phi$$

The jacobian matrix for this coordinate change is

$$J_F(\rho, \phi, \theta) = \begin{bmatrix} \frac{\partial x}{\partial \rho} & \frac{\partial x}{\partial \phi} & \frac{\partial x}{\partial \theta} \\ \frac{\partial y}{\partial \rho} & \frac{\partial y}{\partial \phi} & \frac{\partial y}{\partial \theta} \\ \frac{\partial z}{\partial \rho} & \frac{\partial z}{\partial \phi} & \frac{\partial z}{\partial \theta} \end{bmatrix}$$

$$= \begin{bmatrix} \sin \phi \cos \theta & \rho \cos \phi \cos \theta & -\rho \sin \phi \sin \theta \\ \sin \phi \sin \theta & \rho \cos \phi \sin \theta & \rho \sin \phi \cos \theta \\ \cos \phi & -\rho \sin \phi & 0 \end{bmatrix}$$

Direction - Questions Based on Angles :-

↳ A man is facing towards west and turns 45° clockwise, again 180° clockwise then turns 270° in anti-clockwise direction. In which direction is he facing now?

Step - 2

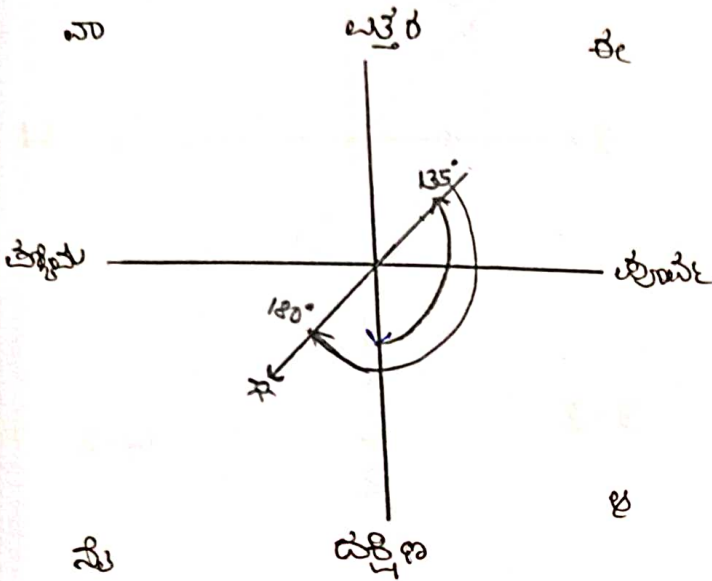

$$\begin{aligned}
 \text{clockwise} &= +45^\circ \\
 \text{clockwise} &= +180^\circ \\
 \text{anti-clockwise} &= -270^\circ \\
 \hline
 &= -45^\circ
 \end{aligned}$$

∴ A man is facing South West Direction.

A man is Facing South. He turns 135° in anti clockwise direction and then 180° in clockwise direction. Which direction is He facing Now?

Step - 1

Step - 2

$$\begin{array}{r} -135^\circ \\ +180^\circ \\ \hline 45^\circ \end{array}$$

\therefore A man is Now Facing in South West direction.

I am Facing East. I turn 100 degree in clockwise direction and then 145 degree in anticlockwise direction. Which direction am I Facing now?

Step-1

Step-2

$$\begin{array}{r}
 +100^{\circ} \\
 -145^{\circ} \\
 \hline
 -45^{\circ}
 \end{array}$$

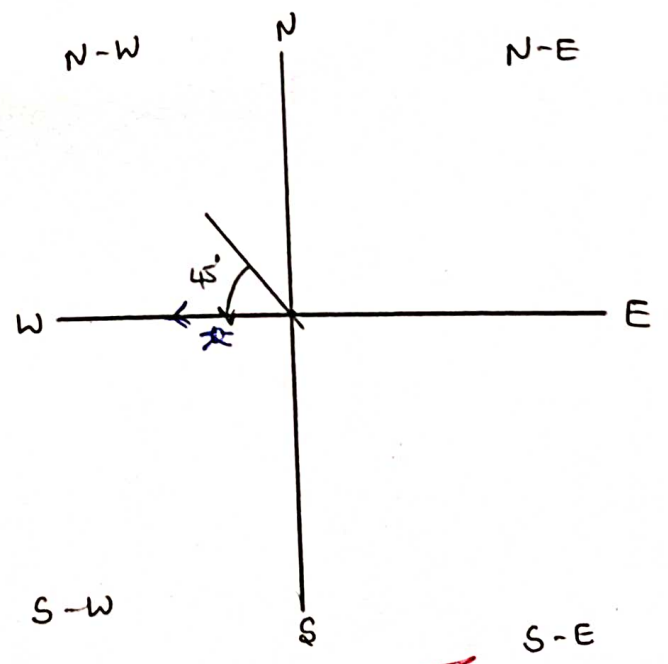

∴ Now I am Facing on North East Direction

④ A man is facing North-West. He turns 90° in clock wise direction and then 135° in anti clock wise direction. Which Direction is he Facing now ?

Step - 1

Step - 2

$$\begin{array}{r}
 + 90^\circ \\
 - 135 \\
 \hline
 - 45^\circ \\
 \hline
 \end{array}$$

∴ A man is now Facing on West direction.

SEMINAR REPORT

(Based on NEP-2020)

Name of the Student : GUNASHREE . M H
Registration Number : U06DE2150138
Semester & Course : IVth SEMESTER , B.SC. [PM]
Academic Year : 2022 - 23
Assignment Topic : FORMATION OF A PARTIAL DIFFERENTIAL EQUATIONS BY ELIMINATION OF ARBITRARY FUNCTIONS.

Assignment submitted to : DEPARTMENT OF MATHEMATICS

Date of submission : 11/07/2023

Principal
D.V.S. College of Arts & Science
Shimoga
valued.

PARTIAL DIFFERENTIAL EQUATIONS:

An equation containing one or more partial derivatives of an unknown function of two or more independent variables is known as partial differential equations.

Example:

$$1. \frac{\partial z}{\partial x} + \frac{\partial z}{\partial y} = z + xy$$

$$2. z \left(\frac{\partial z}{\partial x} \right) + \frac{\partial z}{\partial y} = x$$

Formation of PDE:

A PDE can be formed by two methods.

1. By eliminating arbitrary constants.
2. By eliminating arbitrary functions.

Formation of PDE by Eliminating Arbitrary Functions:-

Problems :-

$$1. z = f(x^2 + y^2)$$

$$\therefore z = f(x^2 + y^2) \longrightarrow (1)$$

Diff partially w.r.t x we get

$$\frac{\partial z}{\partial x} = f'(x^2 + y^2) \cdot 2x \longrightarrow (2)$$

Diff partially w.r.t y we get

$$\frac{\partial z}{\partial y} = f'(x^2 + y^2) \cdot 2y \longrightarrow (3)$$

Now, Divide (2) by (3) gives

$$\frac{\frac{\partial z}{\partial x}}{\frac{\partial z}{\partial y}} = \frac{f'(x^2 + y^2) \cdot 2x}{f'(x^2 + y^2) \cdot 2y}$$

$$\frac{p}{q} = \frac{x}{y}$$

$$p \cdot y = q \cdot x \Rightarrow py - qx = 0$$

is the required PDE.

$$z = f(x+ay) + g(x-ay)$$

$$\therefore z = f(x+ay) + g(x-ay) \rightarrow (1)$$

Diff w.r.t x

$$\frac{\partial z}{\partial x} = f'(x+ay) + g'(x-ay)$$

Again Diff partial w.r.t y

$$\frac{\partial^2 z}{\partial x^2} = f''(x+ay) + g''(x-ay) \rightarrow (2)$$

Diff w.r.t y

$$\frac{\partial z}{\partial y} = f'(x+ay) \cdot a + g'(x-ay) \cdot (-a)$$

Again diff w.r.t y

$$\frac{\partial^2 z}{\partial y^2} = f''(x+ay) \cdot a^2 + g''(x-ay) \cdot a^2$$

$$\frac{\partial^2 z}{\partial y^2} = (f''(x+ay) + g''(x-ay)) a^2 \rightarrow (3)$$

Divide eqⁿ (2) by (3)

$$\frac{\frac{\partial^2 z}{\partial x^2}}{\frac{\partial^2 z}{\partial y^2}} = \frac{f''(x+ay) + g''(x-ay)}{(f''(x+ay) + g''(x-ay)) a^2}$$

$$\frac{\eta}{t} = \frac{1}{a^2} \Rightarrow \eta a^2 = t \text{ is the required}$$

PDE //

$$3. \quad xyz = \phi(x+y+z)$$

$$\therefore xyz = \phi(x+y+z) \rightarrow (1)$$

Diff partially w.r.t x

$$y \left[x \cdot \frac{\partial z}{\partial x} + z \right] = \phi'(x+y+z) \left(1 + \frac{\partial z}{\partial x} \right)$$

$$y(xp + z) = \phi'(x+y+z)(1+p) \rightarrow (2)$$

Diff partially w.r.t y

$$x \left[y \cdot \frac{\partial z}{\partial y} + z \right] = \phi'(x+y+z) \left(1 + \frac{\partial z}{\partial y} \right)$$

$$x(yq + z) = \phi'(x+y+z)(1+q) \rightarrow (3)$$

Divide eqn 2 by 3

$$\frac{y(xp + z)}{x(yq + z)} = \frac{\cancel{\phi'(x+y+z)}(1+p)}{\cancel{\phi'(x+y+z)}(1+q)}$$

$$y(xp + z)(1+q) = x(yq + z)(1+p)$$

Suppose. Shreehari brings a ball for ₹ 422/-
E sells it to his friend for ₹ 699/- Calculate the
Profit & The profit %

$$\begin{aligned}\text{Profit} &= \text{S.P} - \text{C.P} \\ &= 699 - 422 \\ &= 277\end{aligned}$$

$$\begin{aligned}\text{profit \%} &= \frac{\text{Profit}}{\text{C.P}} \times 100 \\ &= \frac{277}{422} \times 100 \\ &= 65.63\%\end{aligned}$$

Suppose Nidhi brings a dress for ₹ 420/- E sells it
to his friend for ₹ 840/- Calculate the Profit & the
Profit %

$$\begin{aligned}\text{Profit} &= \text{S.P} - \text{C.P} \\ &= 840 - 420 \\ &= 420\end{aligned}$$

$$\text{Profit \%} = \frac{\text{Profit} \times 100}{\text{CP}}$$

$$= \frac{420 \times 100}{420}$$

$$= 100 \%$$

$$= 100 \%$$

$$\text{Profit \%} = 100 \%$$

By selling an article for ₹ 800/- a shopkeeper makes Profit of 25% calculate the Cost Price.

$$\text{S.P} = ₹ 800$$

$$\text{P\%} = 25\%$$

$$\text{C.P} = ?$$

$$\text{C.P} = \frac{\text{S.P} \times 100}{100 + \text{P\%}}$$

$$= \frac{800 \times 100}{100 + 25}$$

$$= \frac{800 \times 100}{125}$$

$$= 800 \times \frac{100}{125}$$

$$= 800 \times \frac{4}{5}$$

$$= 640$$

$$= 32 \times 20$$

$$= 640$$

By selling a book for ₹ 750 a shopkeeper makes profit of 3%. Calculate the cost Price.

$$S.P = ₹ 750$$

$$P\% = 3\%$$

$$C.P = ?$$

$$C.P = S.P \times \frac{100}{100 + P\%}$$

$$= 750 \times 100$$

$$100 + 3$$

$$= 750 \times \frac{100}{103}$$

$$103$$

$$= 728.15$$

$$= \frac{15000}{20}$$

$$20$$

$$= 728.15$$

When a man sold an article for ₹ 5401 - he made a loss of 10%. At what Price should he sell it so that he makes a loss of only 5%

When a woman sold an item for ₹ 228/- she made a loss of 2%. At what price she should sell it so that she incurs a loss of only 1%.

$$S.P = 228$$

$$\text{loss}\% = 2\%$$

$$C.P = ?$$

$$C.P = S.P \left[\frac{100}{100} - \text{loss}\% \right]$$

$$= 228 \left[\frac{100}{100} - 2\% \right]$$

$$= 228 \cdot \left[\frac{100}{98} \right]$$

57

$$= \frac{114}{228} \times \frac{100}{98}$$

49 24.5

$$= \frac{5700}{24.5}$$

$$= 232.6$$

$$C.P = 232.6$$

Concept of Entropy

The concept of entropy was first introduced by Clausius in 1854 during his work on the formulation and application of second law of thermodynamics. In order to describe a condition of working substance completely, Clausius felt the need of another variable of state, in addition to volume, pressure, temperature, internal energy etc. This new variable is entropy.

Derivation of planck's law

Planck's radiation law, a mathematical relationship formulated in 1900 by German Physicist Max Planck to explain the spectral energy distribution of radiation emitted by a blackbody.

$$E_{\lambda} = \frac{8\pi hc}{\lambda^5} \times \frac{1}{\exp (hc/kT\lambda) - 1}$$

E_{λ} radiated per unit volume

λ =wavelength) can be written in terms of

h =Planck's constant

C = sped of light

k = Boltzmann constant and

T = absolute temperature

First Law Of Thermodynamics:-

Statement:

The energy entering the system in the form of heat is equal to the sum of the internal energy of the system and the energy leaving the system in the form of workdone by the system on its surrounding.

i.e,

$Q = \Delta U + W$ [conservation of the energy]

INTRODUCTION:

The Maxwell-Boltzmann distribution (also known as the Maxwell distribution) is a statistical representation of the energy of molecules in a classical gas. The distribution of velocities among the molecules of gas was initially proposed by Scottish physicist James Clerk Maxwell in 1859, based on probabilistic reasons. German scientist Ludwig Boltzmann expanded Maxwell's result in 1871 to express the distribution of energy among molecules.

German scientist Ludwig Boltzmann expanded Maxwell's result in 1871 to express the distribution of energy among molecules.

In physics and mechanics, **torque** is the rotational equivalent of linear force.^[1] It is also referred to as the **moment**, **moment of force**, **rotational force** or **turning effect**, depending on the field of study. It represents the capability of a force to produce change in the rotational motion of the body. The concept originated with the studies by Archimedes of the usage of levers. Just as a linear force is a push or a pull, a torque can be thought of as a twist to an object around a specific axis. Torque is defined as the product of the magnitude of the force and the perpendicular distance of the line of action of a force from the axis of rotation. The symbol for torque is typically τ , the lowercase Greek letter tau. When being referred to as moment of force, it is commonly denoted by M .

Character Sketch of Napoleon

Napoleon is the most dominant and perhaps the best developed character by George Orwell in Animal Farm. He is not only cleverest in the farm but also considered the superior among all the animals. He knows how to lead all the animals. His egocentricity is described very evidently in the novel. Because he is egotistic and never, he is able to establish himself as the dictator of the Animal Farm.

Napoleon is a huge potent and vigorous pig. We know this when Orwell describes him as Napoleon was a large

fierece - looking Berkshire booru' (Ch-2, pg-5 online edition) Being the only one from Berkshire. he is generally considered much more superior elite and predominant.

He certainly possesses strong leadership skills due to which he becomes a successful tyrant. He is very intelligent and right after becoming the leader, he immediately learns how to read and write. The writer tells us about this as: with their superior knowledge it was natural that they should assume the leadership (Ch-3, pg-9 online edition) So we can conclude that he is intelligent and well read. This fact contributes to his leadership arousal as he sets himself off at a higher step

than all the other animals. He eventually emerges out as a successful leader in the animal farm.

He is noticeably a perfect deceiver, savage, cruel and ruthless. He is very dishonest and treacherous. He apparently steals the milk during the rebellion. Then he takes all the supply of milk and applies it from animals in a clever and hypocritical way. He is harsh and ruthless in his ways. He uses nine dogs as his body guards and slaughters anyone who shows disloyalty and dishonesty to him. Moreover, to his own benefit, he makes changes in the actual original commandments.

by favoring them for the same reason
stage where evidence of his wicked
qualities like cruelty, savagery and disho-
nesty.

Although he started off by creating
a set of major's principles which implied not
to behave like human, he indeed accepted
human behavior by amending the commandme-
nts to satisfy his own desires. He and
other pigs starts sleeping in a bed witho-
ut a sheet. He engages himself in
trade to earn some money to invest on
the windmill. All these human like
behavior characteristics are adopted by napo-
-leon.

SEMESTER : IV

DATE OF SUBMISSION : 18/08/2023

A.P.J Abdul Kalam.

A.P.J. Abdul Kalam, in full Avul akir Jairulabdeen Abdul Kalam, He was born in October 15, 1931 at Rameshwaram. He was an Indian Scientist and politician who played a leading role in the development of India's missile and nuclear weapons programs. He was ^{11th} president of India from 2002 to 2007. Kalam earned a degree in aeronautical engineering from the Madras Institute of Technology & in 1958 joined the Defence Research & Development Organisation (DRDO) his famous book wings of fire. A.P.J. Abdul Kalam created the Technology Vision 2020 project in 1998. The project sought to develop India's economy through technology, particularly as applied to agriculture

and increase availability of health care & education. In recognition of Kalpana's services to the Country and broad popularity, the national Democratic Alliance Nominated him for president in 2002. He won many awards, both from the Indian government and from the International Community. His most notable awards were the Padma Vibhushan, won in 1990, & the Bharat Ratna, won in 1997, for his Contributions to Science and engineering & Service to the Government.

He had his major in physics. He finally graduated from College in the year 1954. He was responsible for the development of India's first satellite launch vehicle, the SLV-3.

He was appointed as the Chairman
of Technology Information, Forecasting
and Assessment Council (TIFAC)

to Best APJ Abdul Kalam Quotes
for Students looking for.

- ① Dream is not something that
you see while sleeping.
- ② Books become permanent companions.
- ③ One of the very important characteri-
-stics of a student is to question.

The Slogan of Abdul Kalam was

"If you fail, never give up because
FAIL means" First Attempt In Learning.

"Failure will never overtake me if my
determination to succeed is strong
enough." All of us do not have equal talent.

But, all of us have an equal opportunity
to develop our talents.

Dr. A.P.J. Abdul Kalam had special
contribution in the missile development
program in India. That is why
Dr. Kalam is also known as "Missile
Man". He became the 11th President
of India. In addition to it he
had written many books.

A.P.J. Abdul Kalam was died
on July 27, 2015 in Shillong,
Meghalaya.

He was a very hard working person
and had an amiable personality.
This humanitarian behaviour makes
Dr. Kalam a humble personality.

BHAGAT SINGH.

He is referred to as Shaheed Bhagat Singh by all Indians. This outstanding and unmatched revolutionary was born on the 28th of September 1907 in a rich family in Punjab's Doab district. He joined the struggle for freedom. He died at a very young age and died as a martyr at the age of only 23 years.

Childhood Days:-

Bhagat Singh is popular for his heroic and revolutionary acts. He was born in a family that was fully involved in the struggle for India's

Both freedom fighters of that time were known to support the Gandhian ideology.

They always inspired the people to come out in masses to oppose the British. This affected Bhagat Singh deeply. There were loyalty towards the country and the desire to free it from the clutches of the British were imborn in Bhagat Singh. It was running in his

Bhagat Singh's Education:-

His father was of support of
Shakti Vardhi at and when the
father called to be boycotting government
aided institutions to Bhagat
Singh left the school at the of
13 then he joined the National
College at Lahore in college,
he studied the European
revolutionary.

Bhagat Singh's Participation in
the freedom fight:-

Bhagat Singh read many articles
about the European nationalist
movements. Hence he was very much
inspired by the same in 1925 He
founded the Naujawan Bharat
Sabha for his national movement
later he joined the Hindustani
Republican Association where he
came in contact with a member.

100 years.

Leo Tolstoy also known as Lev Nikolayevich was a great master of the 19th century novel. He was a Russian writer. His known work were *Anna Karenina* [1877] and *War and Peace* [1869] and *Anna Karenina* [1877] regarded as the greatest novels of world fiction. He was born in an aristocratic family. He was the fourth of five children and held the title of 'Count' despite not being his father's eldest son. He studied law and languages at Kazan University but left the University in the middle of his studies after leading an indulgent life as a dissolute aristocrat. He joined the army as an artillery officer and served in Sevastopol during the Crimean War however.

His *Sevastopol Sketches* [1858] is based upon his experiences during the war.

Near The Borders of France And Italy, On the
Shore of the Mediterranean Sea lies a tiny little
Kingdom called Monaco may a small country
have more Inhabitants than this
Kingdom.

For there are only about seven thousand
them all told, and if all the land in the
Kingdom were divided there would not be an
acre for each Inhabitant, but in this tiny
Kingdom there is a real Kinglet, and he has
a palace and courtiers and ministers and a
Bishop, and Generals and an Army.

It is not a large Army, only sixty men
in all but still, it is an Army. There were
also taxes in this Kingdom as else where
on tea on tabacco and on wine and spirit

and a poll-tax But thought the people there
drink and smoke as people do in other
countries, there are so few of them that the king
would have been hard put to it to feed his
countries and officials and to keep himself
if he had not found a new and special
source of revenue. This special revenue comes
from a gaming house where people play roulette
people play and whether they win or lose
the keeper always gets a percentage on the
turnover. and out of this profits, he pays
large sum to the king. The reason he pays
so much is that is the only such gambling
establishment left in Europe some of the
same kind, but some one of the little German
sovereigns used to keep gaming houses.

did so much harm. A man would come and
try his luck. Then he would risk all he had
and lose it. Then he would even risk money
that did not belong to him and lose that too
and then in despair he would drown or shoot
himself.

He has his coronation, his levees, he rewards,
sentences and pardons and he also has his
reviews, councils, laws, and courts of justice
Just like other kings, only all on a smaller
scale.

The ministers considered the matter and decided
to address an inquiry to the French government,
asking whether the French could not lend them
a machine and an expert to cut off the
criminal's head.

ANIMAL FARM

George Orwell

George Orwell, the pen name of Eric Arthur Blair, is recognized as one of the prominent writers of the 20th century. Orwell's novel Animal Farm presents a graphic picture of the sufferings of common people under the dictatorship of cruel leaders. The novel satirizes the Russian society under Stalin's regime. Animal Farm, which at the outset appears to be a fable, clearly tells how the power corrupts.

Old Major, a prize-winning boar, gathers the animals of the Manor Farm for a meeting in the big barn. He tells them of a dream he has had in which all animals live together with no human beings to oppress or control them. He tells the animals that they must work toward such a paradise and teaches them a song called "Beasts of England". In which his dream vision is lyrically described.

The animals greet major's vision with great enthusiasm when he dies only three nights after the meeting. Three younger pigs - Snowball, Napoleon, and Squealer - formulate his main principles into a philosophy called Animalism. Late one night, the animals manage to defeat the farmer Mr Jones in a battle, running him off the land. They rename the property Animal farm and dedicate themselves to achieving major's dream. The cart-horse Boxer devotes himself to the cause with particular zeal, committing his great strength to the prosperity of the farm and adopting as a personal maxim the affirmation "I will work harder".

At first, Animal farm prospers. Snowball works at teaching the animals to read, and Napoleon takes a group of young puppies to educate them in the principles of Animalism. Then Mr. Jones reappears to take back his farm, the animals defeat him again, in what comes to be known as the Battle of the Cowshed, and take the farmer's abandoned gun as a token of their victory.

As time passes, however, Napoleon and Snowball increasingly quibble over the future of the farm, and they begin to struggle with each other for power and influence among the other animals. Snowball conceals a scheme to build an electricity-generating windmill, but Napoleon solidly opposes the plan. At the meeting to vote on whether to take the project, Snowball gives a passionate speech. Although Napoleon gives only a brief retort, he then makes a strange noise, nine attack dogs, the puppies that Napoleon had confiscated in order to "educate".

Napoleon now quickly changes his mind about the windmill, and the animals, especially Boxer, devote their efforts to completing it. One day, after a storm, the animals find the windmill toppled. The human farmers in the area declare smugly that the animals made the walls too thin. But Napoleon claims that Snowball returned to the farm to sabotage the windmill.

with his leadership - meet instant death
at the teeth of the attack dogs. With
his leadership unquestioned, Napoleon begins
to make Snowball a villain. Napoleon
also begins to act more and more like
a human being - sleeping in a bed,
drinking whisky, and engaging in trade
with neighboring farmers. The original animal
principles strictly forbade such activities,
But Squealer, Napoleon's propagandist,
justifies every action to the other animals,
convincing them that Napoleon is a great
leader and is making things better
for everyone - despite the fact that the
common animals are cold, hungry and
ill-worked.

Diwali

Diwali or Deepwali, is India's biggest and most important holiday of the year. The festival gets its name from the row of clay lamps (deepa) that Indians light outside their homes to symbolize the inner light that protects from spiritual darkness. This festival is as important to Hindus as the Christmas holiday is to Christians.

Over the centuries, Diwali has become a national festival that's also enjoyed by non-Hindu communities. For instance, in Jainism, Diwali marks the nirvana, or spiritual awakening, of Lord Mahavira on October 15, 527 B.C. In Sikhism, it honors the day that Guru Har Gobind Ji, the sixth Sikh Guru, was freed

From imprisonment. Buddhists in India celebrate Diwali as well.

During the festival, the celebrants illuminate their homes, temples and workspaces with diyas (oil lamps), candles and lanterns. Hindus, in particular, have a ritual oil bath at dawn on each day of the festival. Diwali is also marked with fireworks and the decoration of floors with rangoli designs, and other parts of the house with jhalau. Food is a major focus with families partaking in feasts and sharing mithai. The festival is an annual homecoming and bonding period not only for families, but also for communities and associations, particularly those in urban areas which will organise activities, events and gatherings.

Dasara

The Dasara festivities began with the Vijayanagara Kings as the 14th-15th Century. The festival played a historical role in the 14th Century Vijayanagar empire, where it was called as Mahanavami and the festivities are shown in the relief artwork of the outer wall of the Hazara Rama temple of Hampi.

Vijayadashami, also known as Dussehra Dasara or Dashain, is a major Hindu festival celebrated every year at the end of Navaratri. It is observed on the tenth day of the month of Ashvin, the seventh in the Hindu lunisolar calendar. The festival which typically falls in the Gregorian calendar months of September and October.

REG NO : U06DE21S0020

U06DE21S0149

COMBINATION : PC .

SEMESTER : IV SEMESTER

DATE OF SUBMISSION : 28-06-2023

Determinants of food Consumption:

What is food?

→ Any nutritious substance that people or animals eat or drink or that plants absorb in order to maintain life and growth.

Food choice determinants are frequently presented in four groups:

a) Biologically determined behavioral predispositions, related to an individual's innate abilities related to food, namely the preference for sweet and salty foods;

→ The mechanisms that control hunger and satiety; and the sensory experience provided by food. These are the most basic determinants of food choice, meaning when choosing food or drinks, people firstly follow their preferences.

b) Sensory-affective factors:

Those related to feelings and emotions in relation to food -- acquired familiarity and ability to learn how to like something are at the second level.

c) Intrapersonal factors:

→ It is defined by an individual's beliefs, attitudes, knowledge, skills and social norms, follow the previous factors in determining the choice of food, just like the interpersonal ones, which involve family, friends and other social networks

→ The culture in which each individual was born and raised influences general behavior and food habits. Inter-personal factors theoretical framework was also described by Rothschild, 1999, and applied for example, in BOS, 2016.

→ "Several authors have ascertained that choices depend on the surrounding environment, and are based on one's knowledge and experience."

d) Environmental factors:

→ Environmental factors are the last level determining food consumption. Even though they are the most distant from the individual, environmental factors are the easiest to influence.

→ They include availability and accessibility to food; social environmental and cultural practices; resources; economic environment; food marketing practices.

→ For example:

Resources and economic environment determine food consumption through food cost or individual income.

According to the literature, low income population groups are more likely to adopt unbalanced diets.

Vegetarian Food and Non Vegetarian Food

> Vegetarian food:

→ A Vegetarian diet does not include any meat, poultry, seafood. It is a meal plan made up of foods that comes mostly from plants.

Importance of Vegetarian food:

Plant based diets are generally rich in fiber, phytonutrients, antioxidants, vitamins and minerals, which in turn strengthens the immune system and slows down the ageing process.

What is called Vegetarian:

According to the Vegetarian Society, Vegetarians are people who do not eat the products or byproducts of animal slaughter.

— killing animals for food

Advantages of Vegetarian Food

Weight Loss:

One of the major advantages of being Vegetarian is that you can lose your weight easily. Obesity is considered one of the big problems of today's youngsters. Preferring a vegetarian diet can help us to lose weight effectively.

Obesity: abnormal or excessive fat

2) Ethical Impact on environment :-

→ Many people chose vegetarian diet because they are negative treatment and killing of animals. On the other hand Vegetarians consider that consumption of meat impacts negatively on the environment

→ Consumption of red meats like beef causes deforestation in many parts of the world and it can also contribute to emission of CO_2 in massive amount

A flesh of cow, bull or ox as food

3) Less risk of Chronic disease :

Consumption of Vegetarian food can help us to lead a life which is free from chronic diseases. Most of the non-Vegetarian food items lack in essential nutrients and minerals that can be obtained from vegetables and fruits. Vegetarian diet can cure diabetes and heart related diseases. It would also help in maintaining cholesterol level

4) Less costly :

There is also a financial advantage of being a vegetarian. People spend a good amount for the non-vegetarian food items. While by spending minimum amount we can purchase highly nutritious food for ourselves. We have discussed.

Disadvantages of Vegetarian food:

* Lack of choice in food items:

→ This is one of the major concerns of vegetarians. There are very limited choices of vegetarians. We can notice that in restaurants there is less number of vegetarian food items as compare to non-vegetarian food items.

* Lack of some nutrients:

Generally, vegetarian food items lacks in protein as compare to non-vegetarian food items. Vegetarian food also lacks in calcium. Food of insufficient amount of protein can lead to other kind of diseases.

* Requirement of Supplementation:

→ Vegetarian food items are not sufficient for protein and calcium. In that case, it becomes necessary to supplement our diet with other protein rich food. Vitamin B12 is usually recommended for vegetarians. Preferring vegetarian multivitamin is another option for vegetarians.

25 Non-Vegetarian Food:

→ Non Vegetarian Food means an article of food which contains whole or part of any animal including birds, fresh water (or) marine animals (or) eggs or products of any animal origin, but excluding milk (or) milk products, as an ingredient.

Advantages of Being Non Vegetarian:

Food Variation:

→ A person who eats meat and related dishes has a variety of foods to select from. There are a lot of varieties like chicken, red meat such as lamb, goat, beef, seafood such as fish, lobster, prawns, shrimps, crabs etc... and eggs are example of non vegetarian foods. Moreover, the person who eats non-veg food gets benefits from all sides. He enjoys eating non-veg as well as vegetarian food.

Rich in protein:

Protein consumption is critical for good physical and mental development. Medical studies have shown that protein acquired from animals is superior to protein obtained from plants such as pulses and milk.

Omega 3 Fatty acid:

Non-Vegetarians can reap the benefits of Omega 3 fatty acids, which are found only in seafood. It is the most significant benefit of being a non-vegetarian, whereas vegetarian cannot get these benefits while it is essential to

Keep our hearts healthy. According to study, Omega 3 acids also proved to protect a person from serious illnesses such as cancer.

Mackerel → मकर
Sardine → सार्डिन
Lady fish → लडी फिश
King fish → किंग फिश
Silver fish → सिल्वर फिश

Sharpen your Mind:

Children who have been fed fish since birth have a sharper brain than children who have never eaten fish. Eating fishes such as salmon, tuna, other pond fishes, and sea fishes are non-vegetarian foods rich in omega 3 protein, and Vitamin A, which aid with brain sharpness.

Disadvantages of being Non-Vegetarian:

- Being a Non-Vegetarian, excessive meat consumption has been linked to risk of heart disease, diabetes, kidney disorders, cancer, and weight gain.
- Some farm animals, such as broiler chicken, are raised in unhygienic conditions, eating such food can cause health problems such as stomach pain and intestinal diseases.
- Non-Vegetarian food has a higher risk of constipation and bloating issues.
- Concentration harmed by non-Vegetarian eating. It also makes you more furious and lustful.
- Non-Vegetarian food has more protein which makes digestion more challenging.

* Switching from a Vegetarian to a non-Vegetarian which diet is never recommended

Many drugs, antibiotics are usually supplied to maintain farm animals, and these chemicals reach the food chain and human bodies through non-Vegetarian foods potentially causing immune system disorders.

Excessive eating of non-Veg foods items, such as red meat and other meat, raises cholesterol levels in the body, perhaps leading to steroid hormone imbalance.

The most significant disadvantage of non-Vegetarian eating is the prevalence of violence in humanity.

Conclusion:- Whichever diet we prefer but it should be balanced with all essential nutrients. "A balanced food would only lead us healthier life."

Note: In India 40% population follows meat free diet and India is by far the most Vegetarian country in the world. If we talk about the Vegetarian states, then Gujarat, Haryana, Rajasthan are the places where most of people eat Vegetarian food

Non Veg → Kerala (93%)
Goa (86%)
Assam (80%)

Vegan

Vegan:

Vegan diet is based on plants (such as vegetables, grains, nuts and fruits) and foods made from plants. Vegans do not eat the foods that come from animals, including dairy products and eggs.

> Donald Watson, founder of the Vegan Society, coined the word Vegan in 1944 as a statement against vegetarians who eat dairy products. He took the first and last letters from the word of Vegetarian. to create his orthodox version of Vegetarianism.

List of foods that Vegan can eat:-

- Fruits and Vegetables
- Legumes such as plants
- Nuts and seeds
- Breads, rice and pasta
- Dairy alternatives such as Soyamilk, Coconut milk, almond milk,
- Vegetable oils.

Types of Vegan:-

1. Ethical Vegans
2. Environmental Vegans
3. Health Vegans
4. Religious Vegans.

Veganism:-

Veganism is the practice of abstaining from the use of animal product - particularly in diet - and an associated philosophy that rejects the commodity status of animals.

Are Vegans healthy?

A Vegan diet can be healthy typically higher in fiber and lower in cholesterol than an omnivorous diet. As a result, some studies find a Vegan diet lowers the risk of heart disease and premature death, helps to manage type 2 diabetes and reduces the risk of cancer.

"Israel: This Country Capital City, Tel Aviv, is titled the "Vegan Capital of the World".

Ethical Vegan:

Ethical Vegan is someone who not only excludes animal products from their diet but also tries to avoid using animals, animal products, animal tested products:

Environmental Veganism:

It refers to avoidance of animal products on the premise that the industrial farming of the animals is environmentally damaging and unsustainable. Further motivations for Vegan diets include concerns about animal welfare.

Health Vegan:-

These are the peoples who adopted Vegan style for the sake of health.

Religious Vegan:

Vegans for Religious purpose, i.e., who adopt the Vegan style for religious purpose.

> Well planned Vegan diets are regarded as appropriate for all stages of life, including infancy and pregnancy, as said by the American Academy of Nutrition and Dietetics

> Vegan diets tends to need to be high in dietary fiber, folic acid, Vitamin C, Vitamin E, iron and phytochemicals, and lower in dietary energy, saturated fat, cholesterol, omega-3 fatty acid, Vitamin D, Calcium, Zinc and Vitamin B12.

Conclusion:

As a result of elimination of all products, a poorly planned Vegan diet can lead to particular nutritional deficiencies. Vitamin B12 Supplementation is very important, its deficiency can cause blood disorders.

Vegan diets though suitable to maintain the balanced diet, but deficiency of certain contents may cause health related issues.

Flexitarian

flexitarian diet is a flexible eating style that emphasizes the addition of plant or plant based food and beverages, incorporates dairy and eggs, and encourages meat to be consumed less frequently or in smaller portions. There is no set calorie or macronutrient goals in flexitarian diet.

The flexitarian diet allows dairy and thanks to its bone-strengthening combo of calcium and vitamin D.

Age factor for flexitarians:-

Age is also a factor. A significant trend in dietary preferences is that as consumer age, they are more likely to be flexitarians, while 17% of those aged 18 to 24 describe themselves as flexitarians the number rises to 20% for those aged 45 to 54 and 25% for those 65 and older.

Vegetarianism is the strict practise of abstaining from consuming meat or any other animal tissue. Flexitarianism is a neoteric term that gained a considerable increase in usage in both science and public sectors.

Flexitarian was listed in the mainstream

Merriam-Webster's Collegiate Dictionary in 2012.

In 2003, American Dialect Society voted flexitarian as the year's most useful word.

Foods in Flexitarian type:

1. Fruits
2. Vegetables
3. plant proteins (beans such as black, kidney, or navy edamame, chickpeas, lentils, tofu)
4. Whole grains
5. Eggs
6. Dairy (cheese, yogurt or dairy alternatives)
7. oils, herbs and spices
8. Nuts, nut butters, seeds and healthy fats.

According to Dutch environmental organization Natuur & Milieu, a flexitarian eats no meat, fish or lunch meat for at least one day a week.

Benefits or Advantages of Flexitarian.

Dietitians will always recommend a way of eating that focuses on fruits, and vegetables. The flexitarian diet does not just that. Because of this there are several benefits to this eating style, including,

1. Decreased risk of heart disease
2. Weight loss
3. Decreased risk of Type 2 diabetes or management of pre-diabetes.
4. It may prevent cancer
5. It's good for the environment since you are decreasing your meat consumption, and reducing carbon foot print
6. Even with all the benefits of eating pattern, there are still risks for certain people, cutting back on meat consumption can lead to some nutrient deficiencies like Vitamin B12, zinc and calcium...

∴ Thank you ∴-

ASSIGNMENT

Topic : *Industrialization of Food production and its distribution.*

NAME : Spoorthi D.S
REG NO : U06DE21S0167
COMBINATION : [GM] IInd Bsc
SEMESTER : 4th Sem
DATE OF SUBMISSION : 28/06/2023

Industrialization of Food Production and Distribution.

Food is the basic need of humans for their survival and it becomes important for the policymakers and the government to develop an effective food system will ensure continuous production and supply of the food to the people. Technological advancements were also the major force behind the industrialization of the food system for the good of it and has contributed significantly in increasing the efficiency of the food supply chain.

* Industrialization and Food production:-

Industrialization has always been a major force that has changed the landscape of human civilizations across centuries. The first industrial revolution brought in the transition of from hand production methods to more mechanized production process which contributed significantly to the process of the food supply chain. The second industrial revolution furthers the use of machines and technology for production and that enhanced the food production and food supply chain process more efficiently. The gradual process of enhancement kept

On increasing with new mechanized systems being integrated into the food production world and the food supply chain process. Developed countries have adopted the industrial process within their food supply chain process effectively and that allowed them to enhance their whole food system with increased food productivity and effective distribution of the foods. The developed world has a significant increase in their food storage and has been able to effectively manage the growing demands of food even in the modest seasons.

* Technology within Food Production :-

Technology is at the forefront of all the industrial revolution and for that matter becomes an integral part of the food systems. Technological advancements in the last 50 years have exponentially helped the countries all over the world to enhance their food systems. The developed countries were the first to integrate technology within their food system and for that matter were able to produce food at a fast pace

and at cheaper cost of production as compared to other countries.

All the developed countries were able to transcend the seasons with the help of the technology with a cornucopia of the year round vegetables and fruit supplies. The infusion of technology to produce foods have allowed the producer to manage a steady supply of foods even during off or modest seasons. The technical transformations within the food production and agro based foods made the production process move at a faster speed and in increased capacity. The agro-based food, with the help of technology were processed faster and been able to store it for a longer period. Technology changed processing and storage process where both the activities saw significant changes about how earlier the process were being followed by the producers of the food.

* Global Food System:-

The developed countries and their adoption of technology in enhancing their food system have definitely affected the global food system in a positive way. The global food system was deeply impacted by the industrialization of the food system in ways where export and imports become a major part of the food systems. Countries that were not been able to produce a certain type of food products can now easily imported the same from other countries that is producing it and that made the whole food system an inclusive one and in the providing impetus to the economy of the country exporting the food commodities.

Population Increase and Food Security:

The population of the world has grown exponentially in the last 50 years which is now almost double of what it was in 1980 or so. Food is considered to be the right of every human being and the UN promoted the idea of food security where they take care of the countries and its population does not have the resources and the capabilities to feed their own population.

Impact on Food Quality and Environment

The industrialized food production system has brought a host of new health, environmental, economic and social problems that is yet to be solved. In addition to this, global climate change is a new challenge that is impacting the food system direct and indirect ways.

The industrialized food system is also putting stress on the environment where pollution and increased use of the resources is resulting in global climate change showing in the form of water shortages, floods and increasing global temperature. All these factors have imbalanced the entire food system processes in terms of shortage of supplies.

Conclusion :-

Food system is the lifeline of human civilization and it becomes important for the policy makers to keep it in shape to feed the people. The industrialization process has made enhanced the food system in terms of productivity and distribution process. However in turn it is creating new problems in many

areas like the environment and health which is posing various questions about the impact of the industrialization of the food system. In that case, it becomes imperative for the policy makers to keep a tab on all the aspects of the food system to manage it effectively and efficiently.

Global Overview of Food Consumption: Patterns and Reasons

Global food consumption is quite simply, the amount of food and calories that are consumed by people.

Diets evolve over time, being influenced by many factors and complex interactions. Income, prices, individual preferences and beliefs, cultural traditions as well as geographical, environmental, social and economic factors all interact in a complex manner to shape dietary consumption patterns.

Global Food consumption: Some observations

① Global food consumption is steadily increasing: when we study the amount of global food consumption, some patterns and trends are clearly visible to us. First of all, Global food consumption is increasing from decade to decade. The reasons are

- * population growth.
- * Rising incomes.
- * changing dietary preferences.
- * Increase in the purchasing power of the people.
- * Increase in GDP.
- * Improvement in agriculture and Green revolution.
- * Science and technology now has conquered drought, famine.

Hunger - A Serious problem

Hunger is a physical sensation and desire that signals the body's need for food. When we are hungry, we feel the desire to eat something. After eating food that one sensation i.e. desire disappears. It indicates that the body's need for food intake. It is regulated by complex mechanisms involving hormones, the central nervous system and the genetic system. When the body needs energy, it releases hormones like ghrelin which stimulate appetite and trigger the sensation of hunger. Hunger motivates individuals to seek and consume food to meet their energy and nutritional needs.

Extent of Hunger in Mankind

The number of hungry people globally will rise to 828 million in 2021. About 46 million more than in 2020. This is attributed to the COVID-19 pandemic. This suddenly increased the number of people suffering from starvation to 150 million. According to United Nations report, the world is moving away from the target of ending hunger, food insecurity and malnutrition by 2030, which is a matter of concern.

According to World Health Organisation (WHO) statistics the continent of Asia has more than 5 million hungry people. Africa has more than 250 million and Latin America and the Caribbean have about 40 million hungry people.

Causes of Hunger:-

- ① **Insufficient food intake** :- when individuals do not consume enough food to meet their body's energy and nutritional needs. Hunger can occur which can be caused by limited access to food, poverty inadequate food availability.
- ② **Irregular or Inadequate meals** :-
Skipping meals or having irregular eating habits can lead to feelings of hunger. It can also be caused by busy scheduled, fixed diets or disordered eating behaviours.
- ③ **Medical Conditions** :-
Certain medical conditions or treatment such as gastro intestinal disorders, hyperhidrosis or cancer can affect the flavour and cause increased appetite or difficulty getting enough nutrition.
- ④ **Metabolic factors** :-
An imbalance of appetite - regulating hormones such as ghrelin and serotonin can lead to feelings of hunger, this imbalance can be affected by factors such as lack of sleep, stress or certain medications.

Effects of Hunger

- ① **Physical Discomfort** : Hunger is usually accompanied by physical sensations like stomach rumbling, dizziness

weakness and headache. These disorders can affect daily activities and overall being.

② Shortage of nutrients: Due to prolonged starvation, the body does not get the necessary nutrients. This leads to malnutrition. It leads to deficiency of vitamins, minerals, proteins and carbohydrates in the body which are fundamental for body growth.

③ Weight loss:- Due to hunger, the body experiences a continuous lack of calories. Then body weight loss occurs, excessive or prolonged weight loss can lead to muscle wasting. Diminishes energy to work with enthusiasm. The body's immune system collapses.

④ Impaired cognitive function: cognitive abilities, concentration memory and decision making can be affected. This can have a negative impact on the school going children and the working class.

⑤ Emotional and psychological effects:- chronic hunger can lead to feelings of anxiety, irritability and mood swings. It creates problems like emotional distress, low self-esteem etc. Because of this, people develop a negative relationship with food. Food consumption, fondness for food represents the survival instinct, while wanting and being hungry symbolizes the long for death. Giving up food is a way of surrendering to death.

⑥ Increased vulnerability to illness:- when people do not take enough nutrients, the body's immune system collapses. Immunity is weakened. Such people are easily susceptible to infections.

Urban fringe / being an rural-urban fringe / fringe

The urban fringe is also known as the edge of village or the edge of city. This concept also emphasizes the aspect of rural-urban relationship. The urban areas without proper study of the relationship between them is like looking at one side the coin neglecting the other.

Urban influence is wider than urban. Despite the sociological reality, some scholars have often drawn distinctions b/w rural-urban way of life.

Treated as if they are separate worlds that do not interact with each other. Such a consideration is not a right course of action. View ignores is wider than urban. Despite the sociological reality, some scholars have often drawn distinctions b/w is not a right course of action. Such a view ignores the interdependent and complementary supporting relationships that exist b/w these. These are very deep. Rural-urban linkages are an important aspect of these. These are very deep. Rural-urban linkages are an important aspect of the urbanization process.

Dissociating and shrinking as it moves farther away.

Influence of city and influence of urban life style in then different but mudra can be identified as being on the rural life style.

Rural - urban Relations Assuming New Dimensions Due to urbanisation

Urbanization is in full swing slowing down it is spread is wishing an almost in possible speed. Urbanization is the process by which growing cities expand into borders incompartmentalizing surrounding - villages into their sphere of influence spreading the culture or lifestyle of the city into that zone as well such a segregation city village come together to some extent is what we can village city convergence

Rural - urban relations are taking new dimensions as a result of rapid urbanization across the globe one such new dimension is the village square seen in the outskirts.

A View of The Rural - Urban Fringe

The concept of rural fringe can also be interpreted as an area where urban and rural characteristics merge with respect to the outgrowth of city established suburbs with respect although land may sometimes be used for small-scale agriculture activities like village the patchily organized activities than the central rural of the city and the zoning regulations (zoning regulations) which are strictly enforced in the city are not in force here sometimes the land is used for some undesirable or not so useful purposes for example, such areas are used for dumping garbage and junked vehicle has been called Concept dumping garbage and junked vehicles, has been called

The concept of rural - urban fringe or edge is used to symbolize the suburban areas the city where more or less than sense as a transition

The central city the relationship between

Tare Going of Children and Elderly

Human life goes through many stages like infancy, childhood, youth, middle age, old age and death and it is a law of nature that one can change these stages. But it is possible to see a lot of anomalies only in the psycho-physical conditions of those in these periods. Parasitism is inevitable in both the early and late stages of human life. Parasitism protection from others, care and explanation are inevitable and inevitable in the early stages of infancy and childhood, regardless of the social environment in which one is born. However, although there is a high possibility of becoming parasites even in the old age of life, it is not inevitable or unavoidable. Because, some people who followed strict discipline throughout their lives become centenarians till the point of death due to old age, without becoming parasites, without getting sick, there are examples where they fulfilled their work and needs by themselves.

As the saying goes exceptions cannot become rules. If we consider some such and have to try to live comfortably in the care of others. Similarly one by creating care for children and the elderly is humanitarian duty.

A global trend is emerging. In the light of the medical understanding that the brains of children are almost set in their brains by the time they are four years old, there is a difference of opinion about the necessity of time.

Caring of children and elderly is the Responsibility of Family?

This question that arises is who should take care of husbands and wives, mother, fathers, children and the elderly taking care of evening holidays, living in harmony etc...

Family is the focal point of social life. And in these days when it is universally agreed that the family is the most important social organization that looks after the life of the individual

Even in these days of stormy changes in the family constitution, the importance of family ideals and values, which Indians have traditionally enjoyed, has not weakened or declined. As Anderson and Taylor state, there are those who claim that the family and its members are themselves responsible for many of society's most pressing problems. According to their accusation should the children drop to cause a decline in school academic achievements if all these children are victims of consumption of drugs such as marijuana, heroin, brown sugar consumption at a young age it is due to the severe neglect of the elders of the family, especially those who are taking care of the childrens are even because the value of a persons family values is falling. That is according to the institutional accusers, all the ills of the country will be solved by the work of the family to correct all these types of mentality. Thus, in social institutions, the family alone has been assumed of being the cause of problems.

care giving of children and Elderly

There are two types of care

- ① Formal care
- ② Informal care

Formal care

Institutions system are informal care purchased or assisted care provided to patients in hospitals and segregated - ward clinic and nursing homes and on the ground to leaders for example children to my mother and father, as well as the wife helpful protection to her husband in the past

Formal for older people usually refers to paid care services provided by a healthcare institution or individual for a person in need. Informal care refers to unpaid care provided by family, close relatives, friends and neighbors.

"Care provided in any non-family-based group setting, such as places of safety for emergency care, transit-centers in emergency situations and all other short and long term residential care facilities, including group homes". It is unclear how formal long-term care LTC care background availability affects formal

② Informal care:-

Informal care refers to care for persons with disabilities or older people with care and support needs that is carried out by relatives, friends, acquaintances or neighbours, often without a contractual agreement or formal payment.

Example of Informal Care devote most time to practical care tasks such as shopping and laundry. Large numbers of carers also see a key role in providing company and keeping an eye on the person generally.

Thirty eight percent of informal caregiving is provided by children to aging parents. Eleven percent of informal caregiving is provided by spouse, most often to their elderly wives or husbands. Disabled children most often to adult disabled children by middle aged parents.

Its benefits

Four themes relevant to caregiver benefits emerged. Celebrating the small things, resolving past hurts and conflicts, developing personal strength and aging readiness and experiencing the older person's full life.

work outside the family:

In the period before the industrial revolution, most of the economic activities were done in the family, so there were no workers far going out of family for work, in the days after the industrial revolution, economic activities took place outside the home. This growth has continued and is still the same.

2. who will make the young and old happy while the mature members of the household are in outside world. Secondly, the time when only the husband worked outside the family is over and these days the wife is also working for salary - outside the legal home. In addition, unmarried children are also working regardless of whether they are male or female. In addition to all this, those who are in highly salaried jobs are working more and more overtime hours unlike before.

Efforts to formulate social policy can also inspire some forms of change

However, if such undertakes have an inner experience of the vagaries of family life, the stance they takes will be helpful to substantial adopt to internal conditions families.

CHEMICAL KINETICS

Introduction.

'chemical kinetics' constitutes an important topic in physical chemistry. It deals with measurement of rates of reaction proceeding under given conditions of temperature, pressure and concentration. This study also helps in understanding mechanisms of chemical reactions.

Rate of a Reaction

Consider a simple hypothetical reaction of type

The rate of the reaction at any given time will depend upon the concentration of the reactant A at that time. As the reaction progresses, the concentration of A keeps on falling with time. The rate of the reaction at any given instant is given by the expression.

$$r = \frac{-dC_A}{dt} \longrightarrow \textcircled{1}$$

where $-dC_A$ is the infinitesimally small decrease in the concentration of A in an infinitesimally small interval of time dt

From eqs ①

The concentration of the product P goes on increasing. Hence, the rate of the reaction can also be expressed in terms of increase in concentration of the product P. Thus

$$r = \frac{dC_P}{dt} \longrightarrow \textcircled{2}$$

where, dC_P is an infinitesimally small increase in the concentration of the product P in an infinitesimally small interval of time dt .

From eqs. ① and ②, $r = -\frac{dC_A}{dt} = \frac{dC_P}{dt}$,

for a reaction of the type,

The reaction rate can be expressed as,

$$r = -\frac{dC_A}{dt} = -\frac{dC_B}{dt} = \frac{dC_L}{dt} = \frac{dC_M}{dt}$$

Consider a general reaction of the type,

The rate of such a reaction is expressed in terms of fall in concentration of a reactant per mole or increase in concentration of a product per mole accordingly.

$$r = -\frac{1}{a} \frac{dC_A}{dt} = -\frac{1}{b} \frac{dC_B}{dt} = -\frac{1}{c} \frac{dC_C}{dt} = \frac{1}{l} \frac{dC_L}{dt} = \frac{1}{m} \frac{dC_M}{dt} = \frac{1}{p} \frac{dC_P}{dt}$$

Molar Conductance at infinite dilution

Molar Conductance:-

It is defined as the conducting power of all ions that are formed by dissolving a mole of electrolyte in a solution.

It is denoted by Λ_m or λ_m

$$\Lambda_m = K/c$$

where K is the specific conductance and c is the concentration in mole per litre.

Specific conductivity:-

It is the measure of the ability of an electrolytic solution to conduct electricity.

The S.I unit of specific conductivity is Siemen per meter represented as S/m .

In general, we define the specific conductivity of an electrolytic solution at any given conductance concentration as the conductance of one unit volume of solution that is placed between two platinum electrodes with the unit area of cross section.

Experimental determination of kinetic of inversion of cane sugar by polarimetric method.

Cane sugar is also called sugar cane. Sugars are biological compounds called biomolecules, and the name given for sugar is carbohydrates. The name given to carbohydrates as sugar in scientific term is saccharides. Based on the number of saccharide units present, sugar can be categorised into monosaccharides, disaccharides, polysaccharides.

Sucrose :-

Sucrose dissolved and separated into two units of sugar, and hence it is a reducing sugar. Sucrose is a dextro-rotatory compound with specific rotation $\alpha = +66.5$. Dextro rotation is the turning of plane polarised light in the clockwise direction by the compound in the polarimeter. Sucrose on hydrolysis becomes a strong levorotatory compound.

Transport number

During electrolysis the current carried by the anions and cations and the amount carried by each is proportional to its speed.

If u and v represent the speed of migration of the cation and anion then $\frac{u}{u+v}$ represents the fraction of current carried by the cation and $\frac{v}{u+v}$ represent the fraction of current carried by the anion and is called its transport number. It is denoted by symbols like t_+ and t_- .

Hence

Transport number of cation (t_+) = $\frac{\text{Current carried by the cation}}{\text{Total current}}$

Transport number of the cation (t_+) = $\frac{u}{u+v}$

Transport number

Measurement

① Determination of Dissociation constant of a weak electrolyte

The degree of dissociation constant of a weak electrolyte at any dilution can be calculated by the following relationship.

The ability of a substance to conduct electricity (dissociation constant)

$$K_d = \frac{[B][C]}{[A]}$$

The ratio of concentration of dissociated ions to the concentration of original

$$\alpha_d = \frac{\lambda_m}{\lambda^{\circ} m_{\infty}}$$

where, α = Degree of dissociation

λ_m = molar conductance

$\lambda^{\circ} m_{\infty}$ = molar conductance at infinite dilution

Res
11/7/2023

2022-23

1. Write a Note on Annual Value

→ The annual value of Property is the sum for which a property is reasonably expected to be let from year to year. Hence, the annual value of a property is the amount of notional rent which could have been derived had the property been let.

There are 2 types of Annual Value :-

1. Gross Annual value.
2. Net Annual value.

1. Gross Annual value :-

Gross annual value is the current value, the Actual Rent or the fair Rental value, whichever is highest or which the property might be expected to attract on the open market in ideal circumstances where there is neither a glut nor a shortage of accommodation. $NAV = GAV$ less Municipality tax paid by the owner.

2. Net Annual Value :-

Net Annual value is the rent at which the property might reasonably be expected to let on a year to year basis on the assumption that the tenant is responsible for repairs and insurance and any other expenses necessary to maintain the property in a state to command the Rent. NAV can give you financial advice if you have payment or Debt Problems.

a. Write a Note on PAN

→ PAN Means, Permanent Account Number.

PAN is a unique 10-digit alphanumeric number issued by the income tax Department to Indian taxpayers. The Department records all tax-related transactions and information of an individual against his unique permanent account number.

The Important Benefits of PAN card are as follows :-

1. Helps to Start a Business
2. Deduction in taxation
3. opening a Demat Account & Bank Account
4. Income tax Return Filing
5. Investing and purchasing RBI Bonds & Insurance
6. Buying Foreign Currency
7. Transaction of listed & unlisted securities.

The limit of PAN card is ₹ 1 lakh per transactions. Sale & purchase of any immovable property for an amount exceeding ₹ 10 lakh or valued by stamp valuation authority referred to in section 50C of the Act at an amount exceeding ten lakh rupees. And there are two types of PAN card form that is, Form 49A and Form 49AA.

3. Write Any 25 Incomes which are taxable under the head income from other sources.

- 1. Dividends
2. Interest on Securities
 3. Bank interest on Fixed Deposits
 4. Casual Income
 5. Income from family pension
 6. Composite Rent
 7. Income from subletting
 8. Rental income from Machinery, plant or Furniture
 9. Gifts
 10. Insurance Commission.
 11. Deemed Incomes
 12. Mining Rent / Royalties / Ground Rent
 13. Withdrawal from National Saving Scheme
 14. Agriculture income from a palace outside India
 15. Directors fees or Commission.
 16. Salaries Received by a Member of parliament or MLA or MLC
 17. Rent from land
 18. Examination fees Received by a teacher.
 19. Remuneration received for writing short stories.
 20. Honorarium for checking answer Book.
 21. other incomes.
 22. Winnings from lotteries.

23. Winning from races

24. Income from crossword puzzles.

25. Horse Race etc.

4. Write a Note on Annual Value of let out property.

→ The Annual value of a property is the sum for which a property is reasonably expected to be let from year to year. Hence, the annual value of a property is the amount of Net annual rent which could have been derived, had the property been let. 30% of Net annual value of the house property is allowed as deduction if property is let-out during the previous year. In respect of self-occupied residential house property, interest incurred on capital borrowed for the purpose of acquisition or construction of house property shall be allowed as deduction up to ₹. Income from deemed let out property is calculated as per the following steps:-

1. Calculate Gross Annual Value (GAV)
2. Deduct Municipal Taxes
3. Calculate Net Annual Value (NAV)
4. Claim Standard Deduction of 30%
5. Deduct Interest paid on home loan under section 24 (b).

5. Difference Between Long term Capital gain and Short term Capital gain

Sl No	Basis	Long term Capital gain	Short term Capital gain
1	Type of Investment	Long term Assets Investment	Short term Asset Investment
2	Asset class	Stock / Debt / Real Estate / Gold	Stock / Debt / Real Estate / Gold
3	Equity Assets.	equity Assets holding period > 1 year	equity Assets holding period < 1 year
4	Equity taxation	10% (Exempted up to ₹ 1 lakh)	15%
5	Debt/Bonds	Debt / Bonds holding period > 3 years	Debt / Bonds holding period < 3 years
6	Debt taxability	20% (with Indexation Benefit)	As per the Income Tax slab.
7	Real Estate	Assets / property held > 2 years	Assets / property held < 2 years.
8	Real estate Tax	20% (with Indexation Benefit)	As per the Income tax slab.
9	Gold holding period.	> 3 years	< 3 years
10	Tax on Gold	20% (with Indexation Benefit)	As per the Income Tax slab.

6. Explain the Set off and Carried Forward of loss.

→ Loss under the head "profits and gains of business or profession" can be carried forward only if the return of income/loss of the year in which loss is incurred is furnished on or before the due date of furnishing the return, as prescribed under section 139(1). Set off of losses means adjusting the losses against the profit or income of that particular year.

Intra-head set off :- The losses from one source of income can be set off against income from another source under the same head of income. For eg:- loss from Business A can be set off against profit from Business B, where Business A is one source and Business B is another source & the common head of income is "Business".

Exceptions to an intra-head set off :-

- * loss from an activity of owning & maintaining race-horses will be set off only against the profit from an activity of owning and maintaining race-horses.
- * losses from long term capital loss will only be adjusted towards long-term capital gains.

However, a short-term capital loss can be set off against both long-term capital gains and short-term capital gain.

INTRODUCTION

In mathematics, an equation is a mathematical statement consisting of expression, variable and a constant value which are related with a mathematical symbol of equality. The relation describes that two amongst are equal. The study of these equations using mathematical principles and procedures are called as theory of equations.

The equations are solved to find the variables [unknown values] with the help of parameters [unknown values].

$$\text{Ex : } 4x + 5 = 25$$

Here, The expression $4x + 5$ [LHS] is equal to the constant value 25 [RHS]

Any value of x which satisfies the equation is called a root of the equation and the determination of all possible roots ~~considers~~ the complete solutions of the equation.

The different types of equation are as follows

- 1) Linear equation
- 2) Quadratic equation
- 3) Polynomial equation
- 4) Exponential equation
- 5) Trigonometric equation
- 6) Radical equation
- 7) Rational equation

• Linear equation

An equation consisting of a variable with highest exponent (Power) one is called a linear equation. It is in the form of $ax + b = c$. Here an equation may consist 1, 2 or 3 variables.

Ex: Linear equation with one variable $2x + 4 = 12$

Linear equation with two variable $x + 2y = 6$

Linear equation with three variable $x + y + z = 0$

NOTE: Degree of linear equation is 1.

• Simultaneous equation

Two or more equations that involves two or more variables are called as simultaneous equations with 1 degree of variables are called simultaneous linear equation. Can solved by using any of the following methods

1) Elimination method

2) Substitution method

3) Cross multiplication method.

• Elimination method

Here any variables of the given equations should be equalised by multiplying with the corresponding co-efficient to find the values of x and y .

• Quadratic equation

An equation consisting of a variable or variables with highest exponent (power) two is called a quadratic equation. General form of Quadratic equation is $ax^2 + bx + c = 0$.

There are two types of Quadratic equation.

1) pure Quadratic equation 2) Affected Quadratic equation.

• pure Quadratic equation

A quadratic equation of the form $ax^2 + c = 0$ or $ax^2 = c$

• Affected quadratic equation

A quadratic equation of the form $ax^2 + bx + c = 0$ or $ax^2 + bx = c$

Formula method: Solutions of a Quadratic equation $ax^2 + bx + c = 0$

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

Here, the roots (x values) of the equation it is

also known as shridharacharya formula method

Applications of linear equations in business

Linear equations can be used to explain linear cost function, linear revenue function, linear profit function and linear supply and demand function.

Application of Quadratic equation in Business and economics

Quadratic equations are widely used in science, business and economics. Quadratic equations are commonly used in situations where two things are multiplied together and they both depend on the same variable.

For ex: Quantity of a product sold often depends on the price. We use a quadratic equation to represent revenue as a product of the price and quantity sold.

2022-23

I Answer the following questions

1. An agreement enforceable by law is

Ans. 3. A Contract

2. The act relating to the sales of goods is called

Ans. 1. The Sale of Goods Act, 1930

II

3. Explain three essential of valid Contract

→ ① Offer

② Acceptance

③ Consideration

① Offer + An offer is an expression of willingness to contract on certain terms in exchange of money made with the intention and will be binding upon acceptance to whom it is addressed.

② Acceptance:

Acceptance is another necessary element for a valid contract. Acceptance comes into place after the offer is presented, where the offeree can decide whether to accept the offer or not.

③ Consideration:

An Agreement without Consideration is void. Consideration must be real. It might be service or money.

Q

Explain the elements of free Consent.

① Coercion: Under Section 15, coercion means using force to compel a person to enter into a contract, so force or threats are used to obtain the consent of the party under coercion.

② Undue Influence: Section 16, of the Act, contains the definition of undue influence. It states that when the relations between the two parties are such that one party is in a position to dominate the other party, and uses such influence to obtain an unfair advantage of the other party it will be undue influence.

③ fraud: Under Section 17, fraud means deceit by one of the parties, i.e. when one of the parties deliberately makes false statements.

④ Misrepresentation: Under Section 18, misrepresentation is also when a party make a representation is that is false, inaccurate, incorrect etc, the difference here is the misrepresentation is innocent i.e not intentional

⑤ Mistake:

Mistake is not defined in the Indian Contract Act Section 20, 21, & 22 deals with the concept related to mistake, 'mistake can be defined as any action, decision and judgement that produce an unwanted and unintentional result.

Q. 5. What is Contract? Discuss the essentials of a valid Contract.

① Offer: An offer is an expression of willingness to contract on certain terms in exchange of money made with intention and will be binding upon acceptance to whom it is addressed the person who make offer is called offeror and the person whom offer is made called offeree

② Acceptance :-

Acceptance is another necessary element for a valid Contract. Acceptance comes into place after it is presented, where the offeree can decide whether to accept the offer or not.

③ Consideration :-

An agreement without consideration is void. Consideration must be real. It might be service or money. For example, 'A' promises to pay ₹ 4 lakhs to 'B' to buy the car.

④ Free Consent :-

According to section 10 of the Contract Act 1872, a contract is void if it was entered into by free consent of parties, when a contract is made consent should be there and it should be given by free will without any compulsion.

⑤ Capacity :-

Capacity of a person means those who are parties competent to enter into a contract. It is another important element of contract. The people should be aware of terms and conditions of contract.

5

⑥ legality & It plays vital role in Contract
A Contract for illegal activity cannot be applied
by law. All Contracts are subject to the laws
and their Jurisdiction.

⑦ meeting of minds & This phrase means that parties
entering into contract are intended and willing to
enter into a lawful agreement by their own
will.

⑧ possibility of performance of agreement &

In this case, suppose two people decide to
undergo an agreement where person A agreed to
bring person B's dead relatives back to life. This
will not fall under the legal contract.

⑨ legal formalities &

An oral contract is a perfectly valid
contract, except in those cases where writing
registration etc

⑩ Agreement not expressly declared void &

The agreement must not have been declared to be
expressly void. Agreement mentioned in Sectionary 24
to 30 have been expressly declared to be void

6. Define Contract of sale ? explain the essentials of Contract sale in detail

1. Seller and buyer (Section 29(10 to 13)):

there must be a seller as well as a buyer. "Buyer" means a person who buys or agrees to buy goods [section 29(10)], Seller means a person who sells or agrees to sell goods

2. Goods [Section 2(7)]:

there must be some goods. "Goods" means every kind of movable property other actionable claims and money includes stock and shares.

growing crops, grass and things attached to be forming part of the land which are agreed to be severed before sale or under the Contract of sale.

3. Transfer of property [Section 2(11)]:

property means the general property in goods and not merely a special property. General property in goods means ownership of the goods special property in goods means possession goods. there these must be either a transfer of ownership

48 Price [Section 2(10)] :

there must be price 'price' means the money consideration for a sale of goods. when the consideration is only goods, it amounts to a barter and not sale, where is no consideration, it amount to gift and not sale.

58 Essential elements of valid Contract (Section 2(10))

In addition, to the aforesaid specific essential elements, all the essential elements of a valid Contract Act, 1872 must also be present since a Contract of sale is a specific type of a Contract.

Meaning of liquidation:-

Liquidation or the winding up of a Company means the termination of the legal existence of a Company under such circumstances the assets of the Company are disposed of and the debts are paid.

Types of winding up:-

There are 3 types of liquidation of Company.

A. Compulsory winding up by the Court

B. Voluntary winding up.

(i) members voluntary winding up

(ii) Creditors voluntary winding up.

C. voluntary winding up under the supervision of Court.

A. Compulsory winding up

It can take place when the Company is directed to be wound-up order of Court.

Grounds for Company winding up.

1. If the Company has, by special resolution, resolved that the Company be wound up by the Court.
2. If a default is made in delivering the statutory report of the register of Companies or in holding the statutory meeting of the Company.
3. If the Company does not commence its business within a year from its incorporation or suspends the business for a whole year.

4. If the number of members falls below even in case of a public Company or below two in case of a private Company.
5. If the Company is unable to pay the debts.
6. If the Court is of the opinion that it is just and equitable that the Company should be wound up.

B. Voluntary Winding Up:-

A Company can be wound up voluntarily under the following circumstances.

1. By an ordinary resolution.
 - a. Where the duration of the Company was fixed by the articles and the period expired and.
 - b. Where the articles provided for winding up on the occurrence of any event and the specified event has occurred.
2. By a special resolution.

Types of Voluntary Winding Up:-

1. Members' voluntary winding up.
2. Creditors' voluntary winding up.

C. Voluntary winding up under the supervision of Court:-

At any time after a Company has passed a resolution for voluntary winding up the Court makes an order that the voluntary winding up shall continue.

Liquidator's Final Statement of Account:-

1. Secured Creditors (loan against a property to the extent of secured)
2. legal Expenses.
3. liquidator remuneration.
4. Payments to debenture holders and other Creditors having floating charge on the assets.
5. Payment to be potential Creditors.
6. Payment unsecured Creditors.
7. Calls in advance, if any.
8. Dividend of dividend on cumulative preference shares
9. Amount due to preference shareholders.
10. Amount due to equity shareholders.

The form of liquidator's Final Statement of account is given below.

Name of the Company.

Liquidator's Final Statement of Account.

Receipts	Amt	Payments	Amt
Cash in hand	xxx	Secured Creditors.	xxx
Cash at Bank	xxx	Legal charges.	xxx
Asset realised:-		Liquidator's remuneration.	xxx
Marketable securities	xxx	Debenture holders:-	
B/R	xxx	o/s interest on debentures	xxx
Trade debtors	xxx	Debentures.	xxx
Loans and advances	xxx	Potential Creditors.	xxx
Stock in trade	xxx	Unsecured Creditors.	xxx
Work in progress	xxx	Call in advances if any	xxx
Land and building	xxx	Preference shares	
Plant and machinery	xxx	Preference share Capital	xxx
Furniture and fixtures.	xxx	Equity shareholders	xxx
Patents, trade.	xxx		
Investment	xxx		
Surplus realised from	xxx		
Secured Creditors.	xxx		
Call in arrears.	xxx		
Amount received from Cash on shares	xxx		
	xxx		xxx

Introduction to Banking

Bank is a financial institution which collects money from the public in the form of savings and deposits. The accumulated money is distributed by the way of loans and advances to the needy persons in various fields such as agriculture, industries, commerce etc. . . .

Functions of Bank:

A. Primary Functions of Bank:

The primary functions of a bank are also known as Banking function. They are the main function of a Bank. These primary functions of banks are explained below:

1) Accepting deposits:

The bank collects deposits from the public. These deposits are different types.

a) Savings deposit:

This type of deposit encourages saving habits among the public.

b) Fixed deposit:

The lump-sum amount is deposited at one time for a specific period.

1) Current deposit :

This type of account is operated by businessmen, withdrawals are freely allowed.

2) Recurring deposit :

This type of account is operated by salaried persons and petty traders.

3) Granting of loans and advances :

The bank advances loans to the business community and other members of the public. The rate charged is higher than what it pays on deposits.

a) Overdraft :

This type of advance is given to current A/c holders. No separate account is maintained.

b) Cash credits :

The clients is allowed cash credit up to specific limit fixed in advance.

c) loans :

It is normal for the short terms say one year or medium terms, say five years.

d) Discounting of Bill of Exchange :

The Bank can advance money by discounting or by purchasing bills of exchange.

3. Secondary Functions of Banks:

1) Agency Functions:

The Bank acts as an agent of its customers.

a) Transfer of funds:

The bank transfers funds from one branch to another or from one place to another.

b) collection of cheques:

The Bank collects the money of the cheques through the clearing section of its customers.

c) Periodic payments:

On standing instructions of the client, the bank makes periodic payments in respect of electricity bills, rent, etc.

d) Portfolio Management:

The banks also undertake to purchase and sell the shares and debentures on behalf of the clients.

e) Other Agency functions:

They act as trustees, executors, advisers and administrators on behalf of its clients.

2) General utility Functions:

The bank also performs general utility functions such as:

a) Issue of drafts and letter of credits:

Banks issue drafts for transferring money from one place to another.

b) Locker facility:

The bank provides a locker facility for the safe custody of valuable documents, gold ornaments and other valuables.

c) underwriting of shares:

The bank underwrites shares and debentures through its merchant banking division.

d) Dealing in Foreign Exchange:

The commercial banks are allowed by RBI to deal in foreign exchange.

e) Other utility Functions:

It acts as a referee to the financial standing of customers. It collects credit worthiness information about clients of the customers.

These are the functions of Banking.
