Maths no longer a hard nut to crack: Prof Murthy

SHIVAMOGGA, April 29 (IANS) - Prof S K Narasimha Murthy has opined that Mathematics subject is no longer a hard nut to crack for students as many are scoring high marks in the subject in the recent years.

He said, many have scored well in it. So, students must not consider it as a hard nut to crack. They must learn easy

methods of learning Mathematics effectively. Teachers do play a vital role in making students to understand the subject thoroughly. So, the educational institutes must conduct workshops on regular basis without fail, on subjects in which students score less marks.

He also suggested the students to make use of workshops without fail and interact with experts to know the methods of understanding complex problems in Mathematics easily. This is need of the hour, he added.

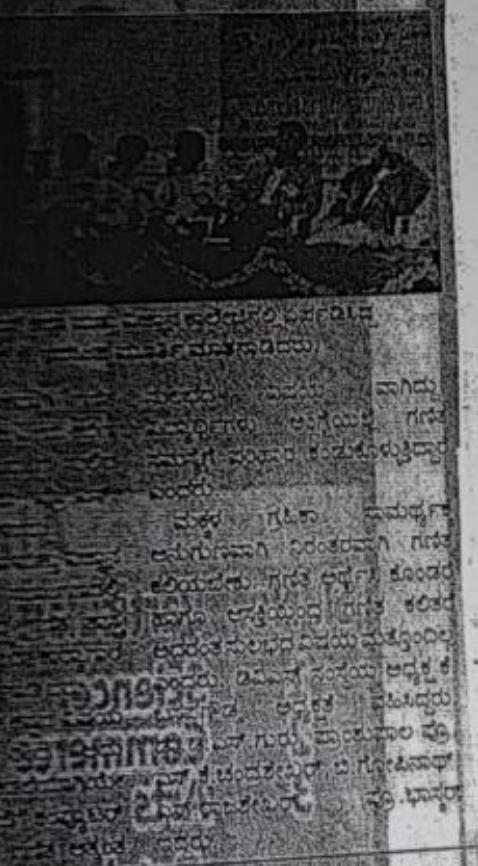

He said, students can understand the complex theories in science and score good marks in examinations. Teachers and students could interact with resource persons during the five-day workshop. The workshop will end on April 30, and students and teachers must participate in it.

Prof S K Narasimha Murthy waters a sapling to mark the inauguration of the five-day workshop on Mathematics & Science in Shivamogga on Thursday.
