

REPORT ON "Prospects in Computational Biology"

One day International Webinar on "Prospects in Computational Biology" was organized by D.V.S College of Arts & Science under the aegis of IQAC, Department of Zoology, Department of Computer Science and Alumni Association of College, on 11.09.2020 at Department of Zoology.

The webinar was inaugurated by the respected president of the college, Shri K Basappa Gowda. Shri N K Rudrappa Gowda Kolale, Vice-president, DVS samithi, Shri S. Rajashekhar, Secretary, DVS samithi, Shri S P Dinesh, Joint0secretary, DVS samithi and Shri B.Gopinath, Treasurer, DVS Samithi graced the occasion by their presence.

Dr H T. Krishnamurthy, Principal, DVS college of arts & Science delivered the inaugural speech regarding the importance of usage of technology in basic science streams. Alumni Association chairman, Prof.H N. Sudhakar invited the virtual gathering.

First session of the webinar was regarding "The understanding of cancer through the eyes of big data". This session was engaged by Dr.Darshan S C., Skilled Bio-informatician and application developer with the expertise in cancer omics, data analysis, University of Alabama, Birmingham, U.S.A.

This session was followed by "Discussion regarding computation for genomic data analysis", deliberated by Dr. Nagesh K A., Senior research investigator, Syngene International, Bangalore.

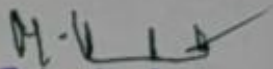

Dr. Geetha Samak concluded that the Computational Biology is an inter-disciplinary field of Science, bio-informatics combines biology, Computer science, information engineering, mathematics and statistics to analyse and interpret the biological data. It involves the development and application of data analytical and theoretical methods, mathematical modeling and computational simulation techniques to the study of biological, ecological, behavioral &

DVS COLLEGE OF ARTS AND SCIENCE, SHIVAMOGGA

social systems. Bio-informatics and computational biology have proven to possess great potential to identify diseases, determine treatment and help to make human lives better. With an inspiration and knowledge of computer science, fields such as gene technology, medicine and health care can evolve from curing individual patients to healing entire population across the globe.

Certificates were issued to the participants who involved actively and submitted feedback form.

About the webinar : Computational biology is an interdisciplinary field of science. Bioinformatics combines biology, computer science, information engineering, mathematics and statistics to analyze and interpret the biological data. It involves the development and application of data-analytical and statistical methods, mathematical modeling and computational simulation techniques to the study of biological, ecological, behavioral, and social systems. Bioinformatics and computational biology have proven to possess great potential to identify diseases, determine treatment and help make human lives better. With the inspiration and knowledge of computer science, fields such as gene technology, medicine and healthcare can evolve from curing individual patients to healing entire populations across the globe.

Scientific deliberations

Session I. 10-10.40am

Speaker Dr. Darshan S C

(Skilled bioinformatician and web application developer with expertise in cancer omics data analysis University of Alabama Birmingham, USA)

Topic: "Understanding Cancer through the Eyes of Big Data."

Session II. 10.50-11.30 am

Speaker Dr. Nagesh K. A.

Senior Research Investigator at Syngene International, Bengaluru

Topic: "Computation for Genomic data Analysis"

ORGANIZING COMMITTEE

Dr. H. T. KRISHNAMURTHY
PRINCIPAL

Department of Zoology
Dr. GEETHA SAMAK,
Mr. N KUMARASWAMY,
Mrs. PRUTHVI K J.

Department of Computer Science
Mrs. NETRAVATHI H
Mr. BASAVARAJ C M
Mr. MEGHARAJA D S
Mr. MANGESH S PAJ
